NUMBER 213

PUBLIC HEARING TO SEPTEMBER GRAND BE GIVEN TO EFFORT JURY ADDS TO WHAT TO DROP DAUGHTERY HAS GONE BEFORE

Washington, D. C., Sept. 12.—A formal hearing, probably open to the press and public, will be held soon in the impeachment proceedings started against Attorney General Daugherty by Representative Keller, Minn., Republican, Chairman Volstead, of the House Judicial Committee, said today. Before the hearing Volstead said he would see Keller and see what evidence he had and then call the committee together. Keller said he hoped he had enough evidence to convince the committee that Daugherty should be removed from office.

ATTORNEY GENERAL DAUGHERTY SUBJECT OF BITTER ATTACK

Chicago, Ill., Sept. 12.—"Attorney General Daugherty's attempt to fasten the blame for violence in connection with the railroad strike on union officials is the most outrageous invasion of individual rights ever carried out under the cloak of a court of justice," Donald Richberg, union attorney, declared in Federal court today. Richberg dramatically waved a copy of a newspaper containing a statement issued by the Attorney General, which he used as the basis of a sensational attack upon the Attorney General.

"This statement is a gross criminal libel and an infringement on the rights of the individual and in contempt of court," Richberg shouted. "If it was perpetrated by an individual instead of by the man who is supposed to be the chief law-enforcing officer of the nation, he would be prosecuted for defamation of character."

THIRTY THOUSAND WAR REFUGEES NOW FACE STARVATION

Smyrna, Greece, Sept. 12.—Thirty thousand refugees here are foodless and the entire population of 700,000 faces famine within a week unless supplies are furnished. H. G. Jacquith, director of Near East relief, stated today. Several hundred thousand persons, mostly Christians, were swept from Smyrna before the armies of the victorious Turks. Before the Turks arrived most of the food had been consumed and part of it carried away by the fleeing Greeks. It was feared that an epidemic would break out which would take the lives of the 700,000 persons who are huddled together in this city. Bluejackets of the United States, Great Britain, France and Italy were on patrol and doing everything possible to protect lives and property.

ONE MAN KILLED, TWENTY INJURED IN \$50,000 FIRE

Baltimore, Md., Sept. 12.—One fire captain was killed and twenty firemen were injured in a fire and explosion in the William Beeler Umbrella plant here early today. Soon after the first streams of water were playing on the fire an explosion occurred and firemen were blown across Lexington street and the blaze reached some of the fire apparatus in front of the building. The damage will probably reach \$50,000.

Passes On 75 New Criminal Cases And Makes Same Recommendations Over Again.

WANT A CLEAN-UP

"The moving finger writes, and having writ marches on," and succeeding Grand Jurors ad lib find the same things to complain of, make the same recommendations, everybody appears to be satisfied to "just let 'er rip," and there you are, but here is the report of the last Grand Jury to pass upon things necessary to be done in and about the Court House and other County buildings. About the only change from the findings of the last several "grand inquirers" is in the number of bills of indictment—that changes each three months. But here's what the September serial finds is necessary to be done. This Grand Jury filed this report on Saturday:

Grand Jury's Report
We, the Grand Jury, inquiring into and for Clearfield county, respectfully report that we have passed upon 75 bills of indictment, of which 39 were returned "true bills" and 6 "not true bills."

Visited County Buildings
We have visited the county buildings and submit the following recommendations concerning same:
The Jail:—We recommend that quarter inch mesh wire screen be placed over windows; that women's room and children's room be painted and plaster repaired and two chairs be supplied woman's room.

County Home:—The woodwork on outside should be painted, repairs made to front porch and a new floor laid in Women's Department; also windows in Men's Ward be replaced and water tank removed; that twelve dozen white porcelain cups be purchased, also some new bedspreads and mattresses. The barn bridge is also in need of repairs.

We find that the County Home is clean and sanitary and everything kept in a cleanly condition.

The Court House:—The Court House from cellar to attic is greatly in need of a vigorous soap and hot water bath.

The Ladies Waiting Room is badly in need of some chairs.

The Grand Jury Room should have the present floor rug replaced by a linoleum rug, the table recovered, new chairs supplied and the old chairs placed in the lobby for the accommodation of witnesses and litigants.

The present traverse jury room should be thrown together for use as a court room and jury rooms. It is supplied on the third floor of the building.

The Law Library:—Is badly in need of new rugs and a general cleaning up.

The thank of the Grand Jury are hereby extended to Judge Bell, District Attorney Arnold, for courtesies shown and to J. M. Rowles, tipstaff, and other court officers for services rendered.

FRED D. OSBURN
Foreman
M. C. LONDON, Secretary.

NY FORD WORKER SMELLING OF LIQUOR WILL LOSE HIS JOB

Detroit, Sept. 11.—The 70,000 men employed by the Ford Motor Company here were under orders from Henry Ford today to leave all forms of liquor, wine and beer alone at all times, under penalty of losing their jobs.

Asserting that drinking among certain of his employees recently had been the cause of accidents in the Ford plants, the manufacturer issued a statement declaring that any of his workmen whose breaths smelled of liquor, who were found to be carrying liquor or who were known to have it in their home would be dismissed at once.

Mr. Henry Ford left yesterday for Bucknell College where he is enrolled as a student.

GRUESOME FIND IN MISSOURI RIVER AT KANSAS CITY, MO.

Discovery of Bodies of 2 Daughters In River Results In The Arrest Of Father.

ANOTHER MISSING

Kansas City, Mo., Sept. 12.—With the bodies of two girls dragged from the Missouri River partially identified as the daughters of Tony Dinello, shantymen, authorities today began seeking details of the mysterious disappearance of a third child, Julia, the eldest child, has not been heard from since she disappeared two years ago, another daughter, Angelina, told the police. Julia, who the father says is married and lives in Pittsburg, Pa., never has been heard from since she left. Partial identification of the two bodies was made by Dinello, who was returned to jail and held on a charge of vagrancy for further investigation. A guard was placed around the shantymen's home in order to watch his wife who has made two attempts to commit suicide.

Kansas City, Mo., Sept. 12.—Tony Dinello, shantymen, today confessed that he murdered his two daughters and threw their bodies into the river to hide his crime.

TARIFF BILL WILL PASS BEFORE WEEK ENDS, IS BELIEF

Washington, D. C., Sept. 12.—The Fordney-McCumber tariff Bill, designated officially as the Tariff Act of 1922, today was returned to the House from conference. After two years in the making the bill in final form was laid before the lower chamber which will consider it tomorrow. Leaders today counted on sending the bill to the Senate Thursday and to the White House soon thereafter. The bill is regarded as the highest tariff ever imposed by an American Congress. The conference, however, slashed materially the high rates in the original Senate bill. Foreign valuation was accepted as the basis for determining rates, except in certain instances. The dye embargo, stricken out by both House and Senate, was reinserted for one year with authority to the President to continue it for a second year.

POPULAR YOUNG PROFESSIONAL MAN CALLED BY DEATH

Dr. Percy L. Showers, one of Clearfield's best known dentists, and a lifelong resident here, passed away at the Clearfield Hospital about 4:30 o'clock Monday afternoon as the result of complications following a surgical operation.

The deceased was a son of the late Joseph S. and Martha Moore Showers and was born in Clearfield in April of 1872. He received his education in the public schools and graduated in dentistry from the University of Pennsylvania. Following his graduation he opened offices here and had built up a lucrative practice. He was an expert dentist and possessed a wide clientele throughout this section.

Dr. Showers was a fine man, possessing a keen sense of humor, and the keenest of loyalty to his friends. He was popular with all who had the pleasure of his acquaintance and his death brings sorrow to a host of warm friends.

He was unmarried and is survived by one sister and two brothers, viz: Mrs. H. P. Bridge, of Clearfield; Ira of Hawk Run and Hepburn, of Washington, D. C.

The funeral will be held from the Bridge home on West Street Thursday morning at 9 o'clock. Interment in Hillcrest cemetery.

WAR AGAIN LOOMS AS TURKS PROGRESS TOWARD BOSPHORUS

Turkey To Demand Return of Constantinople, Which The Allies Will Refuse.

WORST IS FEARED

London, England, Sept. 12.—War between Turkey and the Allies with Constantinople as the prize threatened today. Navy Bey, Turkish delegate in Paris, issued a statement saying that Turkey would demand the return of Constantinople. Invasion of the Constantinople neutral zone would not be permitted, he said. Great Britain, according to word received here, has concentrated her entire Mediterranean fleet in near east waters in preparation for an extreme.

PEACE PLANS ARE HELD UP THROUGH BICKERINGS OF MEN

Chicago, Ill., Sept. 12.—Vigorous objection among union leaders to making a separate peace between the railroad shopmen and individual lines today temporarily held up approval of the plan for a settlement of the railroad strike. The shopmen's advisory committee recessed at noon without taking a vote on the Baltimore peace plan which Best M. Jewell, union president, was said to have accepted. The conference was to be resumed during the afternoon and a decisive action was expected before adjournment tonight.

BRUCE AND FRANCE

Baltimore, Md., Sept. 12.—William Cabell Bruce, Democrat and Senator Joseph I. France, Republican, were nominated for the United States Senate in yesterday's primary.

Born to Mr. and Mrs. Earl Gulich at their home on Turnpike avenue, Monday morning, a 10 pound son.

Mr. and Mrs. M. D. Wilkins, Mr. and Mrs. Ed. Young have returned home from a motor trip to Erie and North East.

PENNSYLVANIA CROPS DOING VERY WELL

The United States Department of Agriculture, Department of Agricultural Economics, makes report thru the office of the Agricultural Statistician of the crop conditions in the State of Pennsylvania, as follows:

Philadelphia, Sept. 12.—Unfavorable weather during August caused a loss to Pennsylvania farmers of over 4,000,000 bushels of corn, 300,000 bushels of oats, 160,000 bushels of buckwheat, and 3,600,000 pounds of tobacco, while potatoes and fruit show a slight increase over August 1 forecast according to the report issued today by G. L. Morgan, U. S. Agricultural Statistician, Bureau of Agricultural Economics.

Corn.
The condition of the crop on September 1 was 86 per cent. of a normal, indicating a yield of 41.7 bushels per acre and a production of 66,277,000 bushels, as compared with 76,272,000 bushels last year, and 63,707,000 bushels, the average production for the past ten years.

Spring Wheat.
The condition of the crop on September 1 was 86 per cent. of a normal, indicating a yield of 17.2 bushels per acre and a production of 258,000 bushels as compared with 225,000 bushels last year, and 270,000 bushels, the average production of the past ten years.

Oats.
The condition of the crop at time of harvest was 87 per cent. of a normal, indicating a yield of 27.5 bushels per acre and a production of 41,467,000 bushels, as compared with 35,283,000 bushels last year, and 38,906,000 bushels, the average production for the past ten years.

Barley.
The condition of the crop on September 1 was 89 per cent. of a normal, indicating a yield of approximately 26.7 bushels per acre and a total production of 320,000 bushels as compared with 280,000 bushels last year, and 287,000 bushels, the average production for the past ten years.

Buckwheat.
The condition of the crop on September 1 was 85 per cent. of a normal, indicating a yield of approximately 19.6 bushels per acre and a production of 4,536,000 bushels as compared with 5,175,000 bushels last year, and 5,310,000 bushels, the average production for the past ten years.

MRS. HARDING SEEMS BE SAFELY THRU CRISIS OF ILLNESS

Washington, D. C., Sept. 12.—The crisis of the grave illness of Mrs. Harding seems to have passed, the six attending physicians reported at 9:42 a. m. today in an official bulletin. The bulletin read:

"Mrs. Harding's condition at 8 a. m.—Temperature 98.8, pulse 94, respiration 32. Early part of the night restless, latter part comfortable. General appearance improved. Enlargement due to the nephrosis decreasing. Crisis seems to have passed. Surgical proceeding seems unnecessary for the present."

"C. E. SAWYER."
The bulletin shows that Mrs. Harding this morning had near normal temperature.

CONFEREES AGREE UPON BONUS BILL

Washington, Sept. 11.—Conferees on the soldier bonus bill reached an agreement late today, and it was announced the measure would be reported tomorrow to the House. It will not be called up there, however, until after the conference report on the tariff bill has been disposed of which may be on Wednesday or Thursday. After the House acts, the bonus will go to the Senate, where also it is to be put behind the tariff.

Four Changes

Four major changes were made in the bill in conference. They were: Elimination of the Simmons amendment authorizing the financing of the bonus out of interest from the foreign debt.

Elimination of the land reclamation feature, which, under the Senate plan, would have involved an expenditure of \$550,000,000.

Eliminating of the time in which veterans might file applications for a bonus to January 1, 1928.

Acceptance of the House provision fixing the amount to be advanced for farm or home aid to the amount of the adjusted service credit increased by 25 per cent in place of the Senate plan of amounts ranging from 100 per cent of the adjusted service credit if the application were made in 1923 to 140 per cent. if application were made in 1928 or thereafter.

PHILIPSBURG MEN ARE THE VICTIMS OF AUTO SMASHUP

New York Central Passenger Train Smashes Their Car at Clearfield Creek Crossing.

IS NARROW ESCAPE

An Essex Sedan occupied by Tex Rice and I. Groskins, Philipsburg brokers, was struck by the Williamsport passenger train on the New York Central railroad at the Clearfield Creek crossing about 5 o'clock last evening. Rice, who owned the car, was driving from Philipsburg. When he approached the crossing, according to the watchman on the Pennsylvania bridge nearby, the car was halted momentarily just before it reached the railroad tracks. Then the driver appeared to think he could beat the train across. He stepped on the gas and—almost did it.

The pilot of the engine struck the car about the middle and smashed the rear end to pieces. The front end was but little damaged, while the occupants very luckily escaped with but slight injuries. Rice had his right knee bruised and sustained a cut over the right eye. Groskins had his nose very badly lacerated and was also bruised about the leg and side. Both men were placed upon the train and taken down to Morrisdale, where they were taken to Philipsburg by trolley. They are able to be about in their room at the Hotel Philips today.

COMMERCIAL CLUB ENTERTAINS PENN STATE'S BIG COACH

The regular meeting of the Commercial Club was held at Jordan's last evening with about 75 members and guests attending. The speaker of the evening was the famed Hugo Bezdek of State College. As the producer of unbeaten athletic teams, especially foot ball, he is known throughout the nation and everyone was so anxious to see him and hear what he had to say that they waited over an hour for his arrival. The storm had delayed Bezdek's party in coming by auto from State College.

President Frantz had no trouble in holding the attention of the members however, as there was considerable business to be transacted and a lively discussion developed on several of the subjects. The effort to have street signs placed, at least on our principal streets, is to be pushed before Council as the new State Highway markers will only follow that that route thru town. Supt. Westcott is at this time organizing a gang to erect the highway markers.

A special Post Office Committee was appointed to immediately take up the matter of better facilities here and the appointment of an experienced man as postmaster. There seems to be little hope of any man improving the service here without better equipment and more assistance.

It was decided to utilize the Commercial Club Booth at the fair for a display of products "made in Clearfield" by members of the Club. A committee was named to confer with the Clearfield Bill Posting Co., with reference to the large sign at the Leonard Crossing of the P. R. R.

Jim Fletcher made his maiden speech as a baby member and it was light there with spirit and enthusiasm for the club and the old town "Dudley Way" led some singing but it did not come up to Sam Womert's ideas so Sam got up on a chair and drew forth a still better effort at close harmony.

With the arrival of Mr. Bezdek, the State College aggregation whooped it up with a yell or two and the club then listened to a decidedly interesting talk. Maintaining high ideals, keeping physically fit, and keeping on the sunny side, were the essentials to making better workers and fighters in community service as well as on the gridiron, he said. The talk was interspersed with many interesting anecdotes of the speaker's life and he also pleaded for our support to a Greater State College.

REPUBLICAN SWEET ELECTS HALE AND CURTIS BY 28,000

Augusta, Me., Sept. 12.—Almost complete returns from State elections show Frederick Hale has been elected over his Democratic opponent Oakley Curtis by at least 28,000 votes. Governor Percival Baxter won over W. R. Tattersall, Democrat, by more than 28,000 votes.

WORLD WAR VETERAN VICTIM OF TRAGIC MINE ACCIDENT

DuBois, Sept. 11.—Thomas L. Evans, fireboss at the No. 1 shaft of the Buffalo & Susquehanna Railroad Company and a popular young World War Veteran, was the victim of a tragic accident at No. 1 Shaft early this morning.

With Theodore Engle, another fire boss, he was riding out of the mines on a motor at 6:20 o'clock when a flash caused by a short circuit in the machine caused him to lose his balance and fall in front of the machine.

The two fire bosses had just completed their daily inspection of the mines, prior to the arrival of the miners, and had mounted the motor. Mr. Evans was driving the machine, sitting upon the front end and riding backwards, according to the official reports of the accident. The machine was approaching the bottom of the shaft when a short circuit caused a flash from which Mr. Evans naturally jerked backward. In this way he became overbalanced and fell in front of the ten-ton machine and had his life crushed out of him in a moment.

His partner went to his aid, stopping the motor and picking up the body but life was extinct and physicians who were summoned, were not needed.

The remains were removed to the N. R. Moore undertaking parlors and prepared for burial.

The deceased was about 24 years old, being one of the younger firebosses of this section. He had been among the first DuBois men to enter the World War and served an excellent record. His widow and two children, in addition to his parents and several brothers and sisters, survive.

BAKER MAKES REPLY TO SLAM GIVEN BY HISTORY RECORDER

Cleveland, Ohio, Sept. 12.—Newton D. Baker, former Secretary of War, today placed his record during the world's conflict on the scales of justice opposite the adverse description published in a supplement to the Encyclopedia Britannica recently. It was Baker's first public statement in connection with the criticism. The statement said in part: The American army won the war, the American people, by their sacrifice and ideals sustained the army and ennobled the cause. The glory of it is a common possession and is a great national tradition. I am deeply interested in gathering the fruits of this victory as justice and peace have gone forward, but I have little interest in the distribution of individual praise or blame.

CAMPAINING IN McKEAN COUNTY

Hon. W. I. Swoope is campaigning in McKean County the latter part of the week and in company with the County Chairman of McKean County will visit Kane, Ludlow, Bradford and the County Fair at Smethport.

Bob Armstrong went to State College today, where he will enroll as a student in the Freshman class.

CROP REPORT

(Continued from Page One)
for the past five years.

Tobacco.

The condition on September 1 was 84 per cent. of a normal, indicating an average yield per acre of 1361 pounds and a production of 55,793,000 pounds as compared with 61,320,000 pounds last year, and 55,611,000 pounds, the average production for the past ten years.

Hay.

The preliminary estimate of the average yield per acre of all tame hay is 1.42 tons and the production, 4,382,000 tons, as compared with 3,630,000 tons last year, and 4,243,000 tons, the average production for the past ten years. The quality of this year's crop was 91 per cent. of a normal as compared with 86 per cent. last year, and 90 per cent., the average quality for the past ten years. Timothy: The average yield per acre of timothy this year is estimated at 1.50 tons as compared with 1.25 tons last year, and 1.40 tons, the average yield for the past five years. The acreage harvested is estimated at 2 per cent. less than a year ago. Alfalfa: The average yield per acre this season is estimated at 2.70 tons as compared with 2.55 ton, last year, and 2.60 tons, the average yield for the last five years. The acreage harvested is estimated at 3 per cent. more than last year. Wild hay: The average yield per acre this season is estimated at 1.20 tons, and the production, 29,000 tons, as compared with 23,000 tons, last year, and 22,000 tons, the average production for the past three years. The quality of this season's crop was 87 per cent. of a normal as compared with 85 per cent. last year, and 92 per cent. in 1920.

Apples.

The condition of the total or agri-

cultural crop on September 1 was 62 per cent. of a normal, indicating a production of 11,574,000 bushels as compared with 2,208,000 bushels last year, and 8,768,000 bushels, the average production for the past three years. The commercial crop this season is estimated at 1,234,000 barrels as compared with 221,000 barrels last year, and 842,000 barrels, the average production for the past three years. The commercial crop in the United States was estimated at 32,600,000 barrels, as compared with 21,200,000 barrels last year, and 26,800,000 barrels, the five year average.

Peaches.

The total production of peaches

this season is estimated at 65 per cent. of a normal or 1,560,000 bushels, the average production for the past three years. The quality of this year's crop was 90 per cent. of a normal as compared with 89 per cent. last year and 88 per cent., the average quality for the past ten years.

Pears.

The condition of the crop on September 1 was 65 per cent. of a normal, indicating a production of 520,000 bushels as compared with 220,000 bushels last year, and 495,000 bushels, the average production for the past three years.

Hogs.

The number of hogs on hand for fattening this fall is estimated at 1,072,000 as compared with 1,051,000

last year, and 1,083,000 in 1920.

Wool.

The total weight of this year's clip was estimated at 3,337,000 pounds as compared with 3,103,000 pounds last year, and 3,582,000 pounds in 1920.

Other Crops.

The condition of other crops on September 1, the condition last year, and the average condition for the past ten years are as follows: Cloverseed, 85, 78, 81; millet 89, 93 90; pastures 80, 82, 90; grain sorghum 60, 87, 87; peas 87, 87, 90; beans 90, 83, 88; tomatoes 93, 84, 86; cabbage 87, 74, 86; onions 89, 83, 88; grapes 95, 38, 76. The total production of watermelons is estimated at 82 per

cent. of a normal, compared with 84 per cent. last year, and 79 per cent., the average production for the past ten years. Cantaloupes: 84 per cent. as compared with 84 per cent. last year, and 82 per cent., the average production for the past ten years.

Prescription Service

It's a wonderful thing to know that you have such a service as this at your command when there is sickness in your home. Everything is done exactly as you would expect it to be done if you were compounding your own prescription for your own loved ones and the effect of the medicine decided their future.

You have just such a service at your command here.

C. R. BLOOM

KEEP THE KIDDIES STRONG AND STURDY WITH OUR MILK

They have started the school year and are going to have more or less of a strain on their little minds and of course this reflects on their bodies. You can keep their bodies right up to standard requirements and in doing this you will keep their minds keen and active if you'll give them plenty of our pasteurized milk.

When they drink our pasteurized milk they are getting all the nutriment that can possibly come in milk that comes from cows fed for the production of high food-value milk. Then this milk gets the best of care from the time it leaves the farm until it reaches your table. Let the kiddies have plenty of our milk.

Clearfield Dairy Co.

WOMEN DON'T GET HILARIOUS

bending over sinks that are set too low. And that's not all. Modern sanitary fixtures properly installed go a long way toward taking the drudgery out of housework. A post card or a phone call will place our knowledge at your service without obligation to you.

Drop in and see our display of kitchen sinks.

Beauty Hint for Women

For clear skin and bright eyes

Take

Beecham's Pills

Sold everywhere in boxes

10c—12 pills
25c—40 pills
50c—90 pills

When food is only imperfectly digested, it gives rise to fermentation, clogs the bowels, and renders the blood impure. This results in dull eyes, muddy skin, blotches, pimples and other disfiguring marks. Beecham's Pills act immediately on the stomach, liver and bowels; regulate them and keep them in a vigorous condition. They are mild, harmless and dependable. They are compounded of remedies of vegetable origin having great medicinal value.

MEN WANTED

Apply either at new works, Reedsville, or at office, Fourth and Pine streets.

PROGRESS BOYS SEE RICHARDS IN FEATS OF MAGIC

Driggs Season Opens
With Fine Entertainment
Provided By
Wizard.

3 DAY ATTRACTION

Monday evening marked the opening of the Driggs theatre for the 1922-1923 season, with an attraction that proved to be entertaining and together refreshing for a fair sized audience. The attraction was Richards, the world's famous "Wizard," who presented a program of amazing and bewildering illusions, mysteries and scientific wonders, of such character as to stamp him the true "wizard" of today.

Mr. Richards is assisted by Miss Crystal Williams and company, and practically all of his numbers are results of his own conception and invention. Among his most famous numbers are the bewildering double submersion, the girl from nowhere, the lady of the lantern, Solomon's pedestal and the levitation which is a most remarkable achievement. The performance concludes with a "seance" in which persons in the audience are privileged to ask Richards anything new desire to know.

Carrier boys of The Progress were guests of the management at last night's performance and they were astonished beyond measure at the bewildering sights fitting before their eyes. Richards will give another performance this evening, tomorrow afternoon and tomorrow night.

BOZDEK TALKS TO THE SCHOOL BOYS

Last evening Clearfield High's children aspirant were treated to a sport talk by Hugo Bozdek, nationally famous football coach from Penn State College.

Coach Bozdek's message was in earnest. Mr. Bozdek, who came directly from Penn State where he was directing the Nittany Lions training a few hours before, gave the Clearfield High boys the same facts and rules that he applied to his own football squad at State with such brilliant results.

In concluding, Mr. Bozdek said, "I wish you boys a successful season."

C. H. S. Working Hard.

Under the leadership of Captain Frank Witherow, Clearfield High's stellar center rush of 1921, the Red and Black footballers have been drilling for the last three weeks.

Due to the opening of school, Walter (Fat) Flegal, of Colorado College, and Lee Hills, Penn State linebacker last fall, put a small but earnest bunch of material through some important preliminary work.

The first day of school, Athletic Director Road of Clearfield High called all football candidates out and since then a squad of thirty-five has been training every evening. The squad and coaches will be taken up at a special article.

ODDS AND ENDS AND THINGS

By J. D. C.

FUNERALS

By ROBERT LOCHRANE
Greatness comes, twice to all; once at birth and once at death. It is greater, however, to be buried than born. There are more present; more flowers; more ceremony. This is a world of commercial values and it costs more to be buried. One is received into life "like a ball tossed from the hand of God." He is a piece of new music, that all want to sing. There is plenty of fuss, but few feathers. Not so at the burial. There fuss and feathers combine. What one fails to do at birth he can make up; but a burial is the last chance. The last opportunity to show off, and few there be who neglect it. A funeral interprets the living more than the dead. It suggests not what the dead was but what we are.

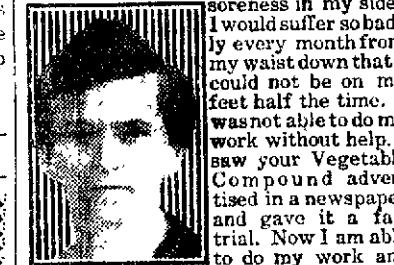

There must always be a display of flowers. Gates ajar, wreaths, crosses, anchors, are all emblems of taste. It matters not what the life was; whether spent in Bethel or brothel, gates and crosses are essential to the exhibit. A sermon is also indispensable—one that reflects honor upon the departed. No spacy abstract, air-shooting generality will do; nothing but a straight aim at the target of his many virtues. The minister is sometimes at a loss to know just what these virtues were. Sometimes they are hard to get at; in such cases one must call at the late residence and ascertain. They usually date back several generations and vanish as you approach the present. One can always find what he searches for, and respectability enough for a text exists in most every life.

I once encountered a desolate husband who refused to be comforted. We flourished our brooms and vainly attempted to mop up the ocean of his grief. He only knit his brow and muttered: "She made such excellent bread." When I heard that I too felt like joining the procession. We have too many reformers and too few who know a loaf of bread from a piece of Quincy granite. That Pharaoh lifted up the head from off his chief baker is no wonder. Think of a king suffering the horrors of indigestion. Pharaoh had little to do but eat and sleep and these his chief baker made impossible. Who would want a drove of cattle marching through his bed chamber night after night, just for the pleasure of being a king during the day? He grew tired of the farce and resolved to break the civil

MRS. LULA VANN FULTON, ARK.

Suggests to Suffering Women
the Road to Health

Fulton, Arkansas.—"I used Lydia E. Pinkham's Vegetable Compound for a soreness in my side. I would suffer so badly every month from my waist down that I could not be on my feet half the time. I was not able to do my work without help. I saw your Vegetable Compound advertised in a newspaper and gave it a fair trial. Now I am able to do my work and my waist down is every month. I am willing for these facts to be used as a testimonial to lead all who suffer with female troubles, as I did, to the right road to health."—Mrs. LULA VANN, Box 43, Fulton, Arkansas.

It is this sort of praise of Lydia E. Pinkham's Vegetable Compound, given by word of mouth and by letter, one to another, that should cause you to consider taking this well-known medicine, if you are troubled with such symptoms as painful periods, weak, nervous feelings, miserable pains in your back, and cannot work at certain times. Here is a woman who is so grateful and glad to be relieved from a painful and nerve-racking physical condition that she wishes to tell all sick women.

service rules and remove for cause. The chief baker lost his head and from then on the king slept like a church warden.

My interpretation may not be in harmony with the old traditions of the commentators: I am a higher critic and in perfect accord with modern scholarship. Our friend had lost a most acceptable cook and appreciated his affliction. It sometimes happens that the departed was in early life a church member. This is a fact that nothing but affliction saves no one. Satan himself was once an angel.

If some men didn't die we would never have known how good they were. "This night brings out the stars." He was an active stone in the pastor's sling where he once lived, but he moved, and forgot the way to church. It is always well to lay the responsibility at the nearest church door. The minister didn't call and the deacons were oblivious to his existence. No one visited him but the doctor, and he came by invitation.

All this time his church letter lay in the trunk, a yellow old leaf that fell from the three of his profession twenty years ago. The report of duty neglected became general throughout the congregation. It crowded out Timbuctoo as a subject at the next Ladies' Foreign Missionary society meeting. One of the members had visited the family herself. There was no hearsay in her testimony; she had a specimen of the hot water straight from the kettle. Every minister ought to know where these old church letters are. He ought to smell them; some I believe do.

Sunday is a good day for a funeral. The minister usually has enough to do, but this particular family never bothered him before and in all probability won't again. Besides one late friend belonged to the Supreme Order of the Everlasting Bow-Wows, and the members can best attend on Sunday. They lose no time and would go somewhere anyway. The uniform of the Bow-Wow fraternity is an attractive one. It consists of stars, sashes, feathers and frills. No Indian on the plains is decked more gorgeously. The band is only attainable on Sunday; other days it parades the streets and keeps "Marching Through Georgia."

The Bow-Wows remain outside while the minister attempts to inventory the virtues of the departed. He believes he was a man of a family and there he will miss him. This is a fine thing. It is well to have two strings always in tune for a dirge. The procession to the cemetery is what was termed imposing. The Bow-Wows are in line and so are the small boys. It is a combination of Decoration day, Fourth of July and the day after.

We have arranged for a representative of Wm. Jackson Sons of New York, the country's greatest furriers, to be at our store tomorrow with a wonderful line of furs and fur coats. There are some beautiful garments on display and you'll see something out of the ordinary if you'll drop in tomorrow.

HERE ARE A FEW OF THEM

Muskrats Coats, plain and trimmed, 40 inch length \$150 to \$290.

Raccoon Coats, 40 and 45 inches long, all selected skins, \$250 and \$300.

Jap Mink and Marmot coats plain and Raccoon trimmed, in 40 and 45 inch lengths.

Australian Sealcoats, 36 to 45 inch long, specially priced \$150 to \$175.

French Squirrel coats, 40 inches long for \$150.

A large selection of plain seal and Hudon seal in different lengths, in plain and trimmed models.

ALL THESE COATS CARRY NOT ONLY THE MAKER'S GUARANTEE, BUT WE ADD OURS UNQUALIFIEDLY.

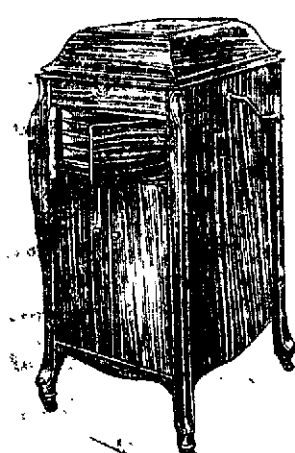

COATS ARE ALL MADE WITH THE LARGE CHIN COLLARS AND HAVE THE NEW MANDARIN SLEEVES. YOU HAVE 75 TO SELECT FROM.

LEITZINGER BROTHERS

on earth" rolled into one. The Clergyman is expected to add his presence. He is not really needed, but there is place assigned him at the end. He shuts the gate when the affair is over. All this in the name of sacrifice and refined civilization. Death rides in a band wagon and the mourners are a part of the procession. Life is a vain show and perhaps the feathers ought only to wait at the grave—Ram's Horn.

Concerning Compensation.
"What is this Emersonian compensation we hear so much about?" asked the Inquisitive Person. "That," said the Clinical Philosopher, "is the doctrine that things are never so bad as they seem, because there are always mitigating circumstances. Compensation is the principle, active in the world, whereby you get a ride to the hospital in the ambulance that knocked you down."

ACHIEVEMENT THE REWARD

Recently Luther Burbank called attention to the difference in reward that accrues to the inventor of a useful device or the author of a popular book and that which is reaped by one who propagates a new and valuable plant. The inventor is protected by patent and is insured payment for the product of his genius.

The author is guarded against piracy of his work by copyright. But the plant wizard, such as Mr. Burbank himself is, is guaranteed no adequate reward. In a much limited way he may profit, but once the improved plant is out of his hands it is beyond his control and yields no return to him whose genius has delved into nature's secrets and had assisted her to produce something better than had hitherto been. While Mr. Burbank himself does not lament this situation, it would be impossible to alter it were he of a mind to do so. Suppose one were to develop a far more productive variety of wheat than has hitherto been grown. The propagator might sell seed at a high price, but he would have competitors the second season in all to whom he sold in the first season, so that the monopoly would cease quickly to exist.

It might be thought that this condition would operate to discourage study and investigation and research to improve plants, but whatever effect might be expected it remains true that development and improvement goes on. Our wheat of today scarcely resembles the crude grain of its earlier development. Corn likewise. There has been improvement and it has been to the benefit of the race that it has been impossible to corner for long any marked betterment in quality and yield of any of the products in which nature has so large a part. Perhaps there was design in this.

We can get along, if need be, without inventions and without books, though not so comfortably, perhaps, but we cannot get along without those things for which we are dependent mainly on nature. Increase of population makes imperative increase in food through quality as well as quantity. Luther Burbank may not reap great financial profit from his discoveries and investigation and experiments, but he has the reward of merit, the satisfaction of having served well his age, and there is no higher reward. It is well that there is one avenue of endeavor where selfishness finds small invitation to enter.

THOSE BOTHERSOME WOMEN

This thing of woman's rights is being carried entirely too far.

In the old days, when a man could collect his two dollars go to the ballot box and show up at home late on election night with a hoarse voice, bulging eyes and a gate unsteady from the excitement of victory or defeat or something of the sort, women knew their places.

They knew then that while they might be shown every consideration, while they might throw away hubby's old brown derby when it was time for him to buy a new one, while they might even buy him cigars with impunity, there was after all just one sovereign in the house, and the brawny old thing that brought home the beefsteak was IT.

But that's all changed now. There was a subtle something about the vote that made for respect. Now women are in on the mysteries of politics, and they have seen what a colossal bluff their husbands had been pulling for all these years.

It's worse this year than at any previous time since the passage of the seventeenth amendment. It has got to the point where a man can't get up any more and orate a little about this broad country of ours, stretching as it does from the rock-bound coasts of Maine to the sun-kissed shores of California, from the pearly lakes of the northland to the waving palms that fringe the Gulf, without a woman wanting to know what was the primary vote in North Dakota, or whether the tariff on wool is higher now than it was in 1894.

The first thing we know, this country's politics is going to have something to do with the practical affairs of its citizens, and then think of the terrible unemployment among the professional politicians!

Not Permanent. When the bride promises to obey she waives her right, but it isn't a permanent waive. — Boston Transcript

Decide the Best You Can. That person who insists upon seeing with perfect clearness before making a decision never does decide.

SAYS---

We have been expecting to see in the paper where some coal wagon driver absconded with a ton.

New York police have dangerous jobs. An actor tried to kiss one.

The woman who loves ever hair in her husband's head hates every hair on his shoulder.

It's about equal. Poor dodge autos and rich dodge baby buggies.

What has become of all these crows for the drink habit you used to see advertised?

Turn your back on your troubles and they get up around your neck.

Some girls dress for town as if they thought the place deserted.

Truth has it on fiction. The human tongue has only eleven muscles.

While driving auto or bargains it is safer to keep to the right.

When you see a man climbing the ladder to success you can bet a woman is holding it.

Still sleeves look as if the dressmaker didn't have enough goods.

Since weary makes one bald, what a pity a man can't worry with his face instead of his head.

Boasting in a bungalow is safe compared to cussing out a waitress.

Better national anthem than "Keep the home fires burning" would be "Darling I am growing cold."

Country bred farmer is worth more money

State College, Pa., Sept. 12.—The country bred farmer is worth more than the city bred farmer by about \$50 a year, it was announced today by Dean R. L. Watts, of the School of Agriculture of the Pennsylvania State College.

Dean Watts, who has just completed a study of the salaries of 250 farm-reared agriculturists and the same number of city-reared men who have "gone back to the farm", found that the former receive a larger salary during their first year out of college and in every succeeding year.

The farm-reared graduates of the School of Agriculture reported an average first year's salary of \$1028, while the city reared graduates report an average average of \$978, the advantage in favor of the former being \$50 a year.

At the present time, the salaries of the first group averaged \$2602 and the second group averaged \$2552, the advantage in favor of the country bred farmer being \$50.

Two hundred young men have applied for admission as new students in the school of agriculture for the college year that opens next Wednesday.

More students regard on the farms and agriculture for practical studies than was the case a decade ago.

Most of those who enter have had farm experience, and all are required to have at least one summer of farm work before graduating.

Sound Heard Round the World.

TESTING ASSOCIATION WORK IN PENNSYLVANIA WILL BE INTERESTING TO CLEARFIELD COUNTY ASS'N MEN

Result Of First Six Months Shows More Than Six Thousand Cows Produced Forty Or More Pounds Of Butter Fat, With Many Above Fifty Pound Mark.

TWENTY THOUSAND COWS ARE ON TEST

The results of cow testing association work in Pennsylvania during the first six months of the year will no doubt be of more than passing interest to Clearfield County farmers who are members of the local association. There are now about fifty of these cow testing groups in operation in every part of the State, representing a total of twenty thousand cows on test. In the report recently received at the Clearfield County Farm Bureau office, it is found that more than six thousand of these cows produced 40 or more pounds of butterfat, one-third of this number having passed the 50-pound mark. About one-third of the twenty thousand cows on test produced over one thousand pounds of milk.

Perhaps the most striking example of the value of the work is the record of unprofitable cows sold, five hundred having been weeded out of the herd and most of them consigned to the butcher's block. Before the end of the year, many more will be consigned to the same fate as a result of the story written in the association records. The report also shows that forty-two pure bred bulls were purchased by members, the new sire in many cases replacing a grade bull that was retarding herd improvement. These interesting facts all tend to show that the dairyman's belief in the application of sound business methods is on the increase. In no other way can he get such sure knowledge of what each cow in his herd is doing, than in the keeping of records as a member of a cow testing association.

"FITTING" FOR THE FAIR IMPORTANT TO ALL EXHIBITORS

Club Members Preparing to Gather In Blue Ribbons And Nothing Should be Left Undone.

DON'T USE TOO MUCH OIL

Many club members, as well as adults, will be showing their pigs at the county fairs this month. You would be surprised to know the number of club members whose pigs won over those of the adults when shown in competition at the fairs last year. Let us try to do even better this year.

Why should I bother showing my pig or hogs at the County Fair? Because it is the best piece of advertising you can do in a year's time. The truth is, you do not show alone for the prize but for the advertising value which showing and winning will give you. It brings your stock to the attention of the prospective buyer.

Last year a number of pigs were oiled before they were shown. This is advisable when done in moderation, but some of the pigs had so much oil on them it fairly dripped from them. It is better to put on oil frequently for a few weeks before the time for showing, then the oil will help to soften up the skin and scurf and give the hair a natural glossy appearance. The following oils can safely be used: Linseed Oil, Machine Oil, Sweet Oil, Low Grade Castor Oil, or the black oil drawn from the tank case of an automobile, and kerosene oil, in sections where it was obtained. Black oil should not be used on Chester White pigs.

You would be surprised to note the difference in the appearance of a pig which has had a long, coarse hair about the ears and face trimmed, which has not. A small pair of scissors are best. Occasionally the hair will break or grow so that the pig will stand up on its toes. A little trimming at the proper places will make the pig to walk and stand a better. Don't cut and judgment must be general, we trim about as you would a horse's hair. Pigs should be shown where there is soft or pasture after this is better still, do it just rain.

Boys and girls have had limited experience in show-

FRANK AND HUFFORD LOOK GOOD AT STATE

State College, Pa., Sept. 11.—Penn State has always been noted for having a strong pair of ends and this year promises to be no exception to the rule, despite the loss of Stan McCollum, one of the best wingmen in the country last year.

The reason for such a statement lies in the showing that has been made thus far by Hap Frank, the Harrisburg boy, who was a substitute last year. Frank did good work in both the Carnegie Tech and Navy games last season when McCollum was hurt. In the preliminary scrimmages this fall, however, the lanky Capitol youth has more than pleased Bezdek with his playing. His specialty is pulling down forward passes, and with two years of varsity competition ahead of him, he should make a great name for himself.

At the other wing, Bezdek will have the old war horse Ross Hufford. The West Virginia boy has been a regular now for two seasons, and although he is now flashy, he is in on every play and rarely misses a tackle. Moreover, Hufford is one of the hardest workers on the squad, and he is nearly always the first man on the field for practice. Today starts the second week of practice at Penn State.

ing their pigs. The main point to keep in mind is to watch the judge. When he wants to see your pig move, be ready to have it walk, or if he wishes to see it standing, try to have it trained so that it will stand still. When you see the judge is no longer interested in your pig drive it off to the side and do not bother him until he wants to see it again. A hurdle is generally used in driving and handling hogs in the show ring. You can easily make one and practice using the hurdle and getting the pig accustomed to it before show time. You can make one of half-inch or heavier boards. It ought to be about three to four feet in length and eighteen to twenty-four inches high, with a handle or some arrangement for holding at the center and top. You walk along holding the hurdle in your hand on the side nearest the pig and thus teach it to go where you wish it to go. A good heavy hurdle is a help to prevent pigs from fighting, as sometimes happens.

Pigs should be crated to be hauled and the most convenient crate is one which opens at both ends. You will appreciate a crate of this type if you have ever tried to back a pig out of a crate when it has decided it does not want to back. If it is necessary to move your pigs a considerable distance it is wise to plan to have them shaded or do the moving in the cool of the morning or evening. The crate or boxes used should not be so tight as to exclude the air. Some people make the mistake of giving the pig a heavy feed before loading to bring to the round-up. This is bad practice, as the pig's stomach is easily upset when hauled or handled much. A light, thick slop is the best feed.

Have record books completely filled in and bring along to the round-up.

BEE KEEPERS HELD INTERESTING MEET AT COURT HOUSE

Professor Rea, extension apiculturist of the Pennsylvania State College, addressed both the morning and afternoon meetings of the Clearfield County Bee Keepers Association on Wednesday, August 23rd. It was the second general meeting of the bee keepers of the county.

During the morning meeting, Professor Rea gave an interesting talk on modern bee keeping, emphasizing the importance of introducing a new stock of gentle bees. Preferably the Italian strain. The Italian queen will average thirty-five hundred eggs every twenty-four hours during the laying season, which is a great deal more than the common queens will do. He stated it will pay to queen every colony every year, and to kill the old queen rather than permit it to be killed after the new queen is admitted. In conclusion he stated that the three essentials in modern bee keeping were, plenty of heat, proper food, and a new queen of the Italian type every year.

During the afternoon meeting, Professor Rea again spoke on the bee industry, as it relates to the entire State, bringing out the interesting fact that Pennsylvania stands well in the lead in the production of honey. He also mentioned another fact that is sad indeed. That is, that the Pennsylvania State College has, at the present time, only one man to take care of the extension work in apiculture, and has no equipment, and not a single colony of bees to experiment with. It is a contention that should be remedied in the near future, and it is hoped that the bee keepers of the State will get behind the movement to install a research department at the Pennsylvania State College for the studying of diseases of bees and other problems confronting the bee keepers.

During the coming month a campaign will be started to raise two million dollars for the college. The bee keepers will be given an opportunity to contribute towards this cause, and it is hoped that upon completion of the campaign, that something definite will be assured to take care of the need of the bee keepers, in the way of research and extension.

At the close of the meeting it was unanimously decided to hold a two-day Institute on Bee Keeping during the month of February, at which time Professor Rea will give illustrated lectures covering the bee industry from beginning to end. These lectures will be interesting not only to the bee keeper but to the general public as well, for the little honey bee is one of the most interesting and most profitable insects on the farm.

These meetings will be advertised and every bee keeper should avail himself of the opportunity to get a thorough knowledge of the industry.

Alphabets Long In Use.

YOU SHOULD ENTER YOUR LIVE STOCK EXHIBITS EARLY

The prospects for a record exhibit of pure bred livestock is brighter than ever before, and the committee is making preparation every day to take care of the exhibits. It behooves every breeder of pure bred livestock to make his entry at once, so that the committee can make the necessary preparation.

The premiums have been increased, and a third added, which is an inducement to every breeder. Let us pull together and make this the largest livestock exhibit in the State. It can easily be done if every one exhibits a few of the best pure-breds.

FEEDING OF HOGS RANKING PROBLEM IN PORK RAISING

There is no other single phase of the hog business that receives quite so much attention as does the problem of feeding. It is equally true that the careful feeder in making up his ration always places particular emphasis on that very necessary constituent of the feed, the protein supplement. Why? Because the common feeds derived from crops produced on the farm are deficient in the nitrogen-containing nutrient. The only protein feed that is produced on the farm and used in its original form as a feed, is milk. Milk in any of its various forms makes a good, cheap protein feed.

Of the protein supplements sold on the market, tankage is perhaps the most commonly used in swine feeding. It is an animal product, the value of which depends entirely upon its grade, as indicated in the percentage of protein contained. The higher grade is usually the most satisfactory because of its greater content of protein and its better preparation. Fish meal has proven to be a better purchase for the feeder of swine in some localities, where meal containing the same amount of protein as a good tankage can be obtained at a lesser cost.

Linseed oil meal has been used as a substitute for tankage at times but being a plant product it is not as satisfactory under all conditions. Oil meal is good when a laxative condition is desired in the individual. While middlings and protein supplements also find occasional use in hog rations, milk, tankage, fish meal, and oil meal are the most valuable and successful protein feeds in use under ordinary conditions.

Circumstances.
Believe only that your circumstances are those most suited to develop your character. They have been selected out of all possible combinations of events and conditions, in order to effect in you the highest finish of usefulness and beauty; they would have been the ones selected by you, if all the wide range of omniscient knowledge had been within reach.—F. B. Meyer

ELECTRIC LIGHTS SHOULD BE PLACED PROPERLY IN PENS

In some instances where Clearfield County farmers have installed electric lights in their poultry houses, the lights are not properly located to bring about the best results. The strength of the lamps, with which the houses are equipped, may also be defeating the purpose of illumination in the economical production of eggs. Where lamps of great power are used, the expense item enters in

CARE OF SOW AND LITTER TIL WEANED MOST IMPORTANT

The one important lesson for Clearfield County farmers in present day swine management is that there is no profit in raising only a small percentage of the litter. Prominent and successful hogmen claim that ninety-five per cent. of the pig losses at farrowing time are preventable. Some of the common causes for such losses are, lack of attention, improper quarters, overfeeding, wrong feeding, and lack of exercise. If the producer would insure himself of a goodly percentage of pigs raised he has only to keep close watch on the sow, give attention when necessary, and use good common sense reasoning.

It is not necessary to make "hot-house" individuals out of the sow and her litter. Twenty-four hours after farrowing, give a thin slop of bran and oats, using milk if the sow is slow in coming into suckling. If the sow is a heavy suckler, do not use milk in the feed for two or three days. The sow should be provided with an outside run and plenty of green feed also. After the bran and oats slop, the sow can be put back on the regular feed. While no one combination can be called the best for this period, a mixture of forty pounds of cornmeal, thirty of middlings, ten of oats, ten of tankage, and five of oil meal will be found to be good. When the pigs are a few days old, the sow should have all she will clean up nicely three times a day.

To prevent thumps, the pigs should be encouraged to take exercise. As soon as they show an inclination to eat, a small creep should be built in one corner of the pen. Place a small, low trough in the creep and keep some dry cornmeal, sifted ground oats and middlings before them all the time. Let them have all they will eat up until weaning time, only making sure that the feed is not allowed to become old, foul and unappetizing to the young pig. The boar pigs may be castrated at six weeks of age without any check in growth, and weaned at eight weeks.

Selecting Cockerels Is Important

The selection or purchase of breeding cockerels is a phase of poultry management that the flock owner usually postpones until a few weeks before the male birds are needed in the spring. In most cases Clearfield County farmers have found the prices high and the supply limited when they try to obtain males just before the breeding season begins. At the present time, however, the selection can be made from a larger number, and at a much more reasonable price. The health and vigor of the young stock are big factors in future development, and purchase at this time permits satisfactory observation in this respect.

It is highly desirable that any Clearfield County farmer who expects to buy breeding males, should place his order within the next few weeks and, if possible, visit the place from which the birds are procured so that he may be sure of the vigor of the stock. While it is true that many young cockerels, showing considerable promise at this time, may prove disappointing as they mature, the early order enables the breeder to make an accurate estimate of the number of birds he must keep in order to supply the demand.

Children In Russia.
Russian peasant women have, on an average, from six to twelve children, of whom about half survive.

RELATION BETWEEN PORK PRODUCTION AND CONSUMPTION IN CLEARFIELD CO. SHOWS NECESSITY FOR GREATER EFFORT

Former County Farm Agent A. T. Kearney Talks Very Entertainingly On This Highly Important Proposition To Clearfield County Farmers; We Raise One-Fourth Our Needs.

ADVOCATES RAISING HOGS TO SHIP

By A. T. KEARNEY (Former County Agent.)

According to the Federal census of 1920 there were 103,236 people in Clearfield County. Judging by the rate of increase during the previous decade, the number at present is undoubtedly in excess of 105,000. The Department of Agriculture estimates that the combined annual consumption of pork and lard in the North Atlantic States is about 80 pounds per capita. These figures would lead to the conclusion that the total consumption of all pork products in the county is about 8,400,000 pounds per year.

The 14th census reports that there are 10,660 hogs on Clearfield County farms on January 1, 1920. This is about three thousand less than was reported by the 13th census, on April 1, 1910. Of the number reported 7,508 were given as being under six months of age. These figures would indicate that the total slaughter of hogs would not exceed 10,000 per year. The average dressed weight of hogs produced in the county is probably around 175 pounds per head, which, applied to the above figure of 10,000 would result in an annual production of 1,750,000 pounds of pork.

If these figures are even approximately correct, it is evident that this county produces less than 25 per cent. of the pork it consumes. The farm population of the county is in the neighborhood of 15,000 people, which would indicate that at least half of the pork produced in the county is consumed on farms. The remainder left for market, which is probably somewhat less than a million pounds, is marketed chiefly during the fall and early winter months and is sold largely through meat markets to consumers in the form of fresh pork.

It would appear from the above statistics that Clearfield County is dependent on outside sources for at least three-fourths of its total supply of pork products and almost its entire supply of cured pork products, such as bacon, hams, and lard. Neighboring counties to the west are in somewhat the same condition, and the State of Pennsylvania as a whole is far from being self-supporting in production of pork products. The deficiency in supply must, therefore, come largely from without the State.

It is estimated that 90 per cent. of the commercial supply of hogs comes from the Corn Belt States, and when it is considered that the eastern States of the Corn Belt group are little more than self-supporting in the production of pork products, it is apparent that a very large percentage of the pork consumed in Clearfield County comes from hogs grown in such States as Iowa, Nebraska, and Missouri.

In this practice of hogging-off corn, the pigs should be gradually accustomed to the green corn before turning them into the field. They should not be put in until two or three days before the corn is ready to cut. If only a part of the corn is to be given over to the hogs, a temporary fence should be constructed to confine them in the desired area. An acre of average corn will ordinarily be sufficient to finish five to seven 125-pound hogs for market. A constant supply of fresh water should be at hand, and the pigs should also be given some protein supplement, preferably tankage, which may be placed in a self-feeder and kept before them at all times.

Worth While Quotation.
"Some people seem to take up all the sorrows of the past; to them they add the burdens of the present; then they look ahead and anticipate a great many more trials than they will ever experience in the future."

TESTING ASSOCIATION WORK IN PENNSYLVANIA WILL BE INTERESTING TO CLEARFIELD COUNTY ASS'N MEN

Result Of First Six Months Shows More Than Six Thousand Cows Produced Forty Or More Pounds Of Butter Fat, With Many Above Fifty Pound Mark.

TWENTY THOUSAND COWS ARE ON TEST

The results of cow testing association work in Pennsylvania during the first six months of the year will no doubt be of more than passing interest to Clearfield County farmers who are members of the local association. There are now about fifty of these cow testing groups in operation in every part of the State, representing a total of twenty thousand cows on test. In the report recently received at the Clearfield County Farm Bureau office, it is found that more than six thousand of these cows produced 40 or more pounds of butterfat, one-third of this number having passed the 50-pound mark. About one-third of the twenty thousand cows on test produced over one thousand pounds of milk.

Perhaps the most striking example of the value of the work is the record of unprofitable cows sold, five hundred having been weeded out of the herd and most of them consigned to the butcher's block. Before the end of the year, many more will be consigned to the same fate as a result of the story written in the association records. The report also shows that forty-two pure bred bulls were purchased by members, the new sire in many cases replacing a grade bull that was retarding herd improvement. These interesting facts all tend to show that the dairyman's belief in the application of sound business methods is on the increase. In no other way can he get such sure knowledge of what each cow in his herd is doing, than in the keeping of records as a member of a cow testing association.

"FITTING" FOR THE FAIR IMPORTANT TO ALL EXHIBITORS

Club Members Preparing to Gather In Blue Ribbons And Nothing Should be Left Undone.

DON'T USE TOO MUCH OIL

Many club members, as well as adults, will be showing their pigs at the county fairs this month. You would be surprised to know the number of club members whose pigs won over those of the adults when shown in competition at the fairs last year. Let us try to do even better this year.

Why should I bother showing my pig or hogs at the County Fair? Because it is the best piece of advertising you can do in a year's time. The truth is, you do not show alone for the prize but for the advertising value which showing and winning will give you. It brings your stock to the attention of the prospective buyer.

Last year a number of pigs were oiled before they were shown. This is advisable when done in moderation, but some of the pigs had so much oil on them it fairly dripped from them. It is better to put on oil frequently for a few weeks before the time for showing, then the oil will help to soften up the skin, and scurf and give the hair a natural glossy appearance. The following oils can safely be used: Lined Oil, Machine Oil, Sweet Oil, Low Grade Castor Oil, or the black oil drawn from the tank case of an automobile, and used oil, in sections where it was obtained. Black oil should not be used on Chester White pigs.

You would be surprised to see the difference in the appearance of a pig which has had a long, coarse hair about the ears, tail, ears and face trimmed, and one which has not. A small pair of blunt scissors are best for this work. Occasionally the ears of a pig will break or grow out of proportion so that the animal does not stand up on its toes; it should. A little trimming of the hoofs at the proper places will cause the pig to walk and much better. Don't cut too deep, and judgment must be used. In general, we trim about the same as you would a horse's hoof. This should be done at least a week before you show your pig, so that any soreness or lameness will pass before the round-up is held. Pigs should be put where there is soft ground, or pasture after this is done, or better still, do it just after a rain.

Many boys and girls have had very limited experience in show-

FRANK AND HUFFORD LOOK GOOD AT STATE

State College, Pa., Sept. 11.—Penn State has always been noted for having a strong pair of ends and this year promises to be no exception to the rule, despite the loss of Stan McCollum, one of the best wingmen in the country last year.

The reason for such a statement lies in the showing that has been made thus far by Hap Frank, the Harrisburg boy, who was a substitute last year. Frank did good work in both the Carnegie Tech and Navy games last season when McCollum was hurt. In the preliminary scrimmages this fall, however, the lanky Capitol youth has more than pleased Bezdek with his playing. His specialty is pulling down forward passes, and with two years of varsity competition ahead of him, he should make a great name for himself.

B. Meyer

and where weak lamps are in use there is not sufficient intensity of light and the activity of the birds is thereby limited. Recent experiments show that a standard forty watt Mazda lamp in a cone reflector sixteen inches in diameter and four inches high, hung six feet above the floor, gives good results. These lights should be located ten feet apart, along a line midway between the front of the house and the front of the dropping board. One lamp gives sufficient light for two hundred square feet of floor space, according to information from the Pennsylvania State College poultry specialists.

CARE OF SOW AND LITTER TIL WEANED MOST IMPORTANT

The one important lesson for Clearfield County farmers in present day swine management is that there is no profit in raising only a small percentage of the litter. Prominent and successful hogmen claim that ninety-five per cent. of the pig losses at farrowing time are preventable. Some of the common causes for such losses are, lack of attention, improper quarters, overfeeding, wrong feeding, and lack of exercise. If the producer would insure himself of a goodly percentage of pigs raised he has only to keep close watch on the sow, give attention when necessary, and use good common sense reasoning.

It is not necessary to make "hot-house" individuals out of the sow and her litter. Twenty-four hours after farrowing, give a thin slop of bran and oats, using milk if the sow is slow in coming into suckling. If the sow is a heavy suckler, do not use milk in the feed for two or three days. The sow should be provided with an outside run and plenty of green feed also. After the bran and oats slop, the sow can be put back on the regular feed. While no one combination can be called the best for this period, a mixture of forty pounds of cornmeal, thirty of middlings, ten of oats, ten of tankage, and five of oil meal will be found to be good. When the pigs are a few days old, the sow should have all she will clean up nicely three times a day.

To prevent thumps, the pigs should be encouraged to take exercise. As soon as they show an inclination to eat, a small creep should be built in one corner of the pen. Place a small, low trough in the creep and keep some dry cornmeal, sifted ground oats and middlings before them all the time. Let them have all they will eat up until weaning time, only making sure that the feed is not allowed to become old, foul and unappetizing to the young pig. The boar pigs may be castrated at six weeks of age without any check in growth, and weaned at eight weeks.

Selecting Cockerels Is Important

The selection or purchase of breeding cockerels is a phase of poultry management that the flock owner usually postpones until a few weeks before the male birds are needed in the spring. In most cases Clearfield County farmers have found the prices high and the supply limited when they try to obtain males just before the breeding season begins. At the present time, however, the selection can be made from a larger number, and at a much more reasonable price. The health and vigor of the young stock are big factors in future development, and purchase at this time permits satisfactory observation in this respect.

It is highly desirable that any Clearfield County farmer who expects to buy breeding males, should place his order within the next few weeks and, if possible, visit the place from which the birds are procured so that he may be sure of the vigor of the stock. While it is true that many young cockerels, showing considerable promise at this time, may prove disappointing as they mature, the early order enables the breeder to make an accurate estimate of the number of birds he must keep in order to supply the demand.

RELATION BETWEEN PORK PRODUCTION AND CONSUMPTION IN CLEARFIELD CO. SHOWS NECESSITY FOR GREATER EFFORT

Former County Farm Agent A. T. Kearney Talks Very Entertainingly On This Highly Important Proposition To Clearfield County Farmers; We Raise One-Fourth Our Needs.

ADVOCATES RAISING HOGS TO SHIP

By A. T. KEARNEY
(Former County Agent.)

According to the Federal census of 1920 there were 103,236 people in Clearfield County. Judging by the rate of increase during the previous decade, the number at present is undoubtedly in excess of 105,000. The Department of Agriculture estimates that the combined annual consumption of pork and lard in the North Atlantic States is about 80 pounds per capita. These figures would lead to the conclusion that the total consumption of all pork products in the county is about 8,400,000 pounds per year.

The 14th census reports that there are 10,660 hogs on Clearfield County farms on January 1, 1920. This is about three thousand less than was reported by the 13th census, on April 1, 1910. Of the number reported 7,508 were given as being under six months of age. These figures would indicate that the total slaughter of hogs would not exceed 10,000 per year. The average dressed weight of hogs produced in the county is probably around 175 pounds per head, which, applied to the above figure of 10,000 would result in an annual production of 1,750,000 pounds of pork.

If these figures are even approximately correct, it is evident that this county produces less than 25 per cent. of the pork it consumes. The farm population of the county is in the neighborhood of 15,000 people, which would indicate that at least half of the pork produced in the county is consumed on farms. The remainder, left for market, which is probably somewhat less than a million pounds, is marketed chiefly during the fall and early winter months and is sold largely through meat markets to consumers in the form of fresh pork.

It would appear from the above statistics that Clearfield County is dependent on outside sources for at least three-fourths of its total supply of pork products and almost its entire supply of cured pork products, such as bacon, hams, and lard. Neighboring counties to the west are in somewhat the same condition, and the State of Pennsylvania as a whole is far from being self-supporting in production of pork products. The deficiency in supply must, therefore, come largely from without the State.

It is estimated that 90 per cent. of the commercial supply of hogs comes from the Corn Belt States, and when it is considered that the eastern States of the Corn Belt group are little more than self-supporting in the production of pork products, it is apparent that a very large percentage of the pork consumed in Clearfield County comes from hogs grown in such States as Iowa, Nebraska, and Missouri.

HOGGING-OFF CORN WAS PROFITABLE TO MANY FARMERS

Last fall, ten farmers in seven counties of the State secured an average daily gain of 1.4 pounds per head on 285 fattening hogs by hogging-off corn. After the cost of all supplementary feed, extra fencing, interest and labor had been deducted from the income on the operation, the farmers found that they had received an average net price of \$1.22 per bushel for their corn in letting the hogs harvest the crop. Corn was then selling on the Clearfield County markets at eighty cents a bushel. The best results were obtained by the farmers who had sown rape at the last cultivation of corn, or where soy beans had been drilled when the corn was planted.

Very obviously, a marketing problem is created by the fact that Clearfield County is dependent upon sections several hundreds of miles away for a large percentage of its supply of pork products. The problem is further complicated by the fact that consumer demand is not for hogs but for pork. In other words, the housewife does not go to the meat market and ask for so many pounds of pig, but specifies the particular cut or product that she wishes, such as bacon, ham, lard, or pork chops. Usually her purchases are made in small quantities, and, during hot weather, frequently in a form that requires little preparation. Hence, we find the "whole hog" of the Iowa farmer being parceled out by the 13th census, on April 1, 1910. Of the number reported 7,508 were given as being under six months of age. These figures would indicate that the total slaughter of hogs would not exceed 10,000 per year. The average dressed weight of hogs produced in the county is probably around 175 pounds per head, which, applied to the above figure of 10,000 would result in an annual production of 1,750,000 pounds of pork.

The significance of this development in the marketing of hogs is very great. It means that the hog producer who ships his animals to one of the large packing centers places them on a world market. Keen competition in the manufacturing and merchandising of pork products guarantees him a price that is determined by world conditions of supply and demand. Local gluts and shortages are minimized. Stability and confidence are promoted.

Clearfield County has never produced hogs in commercial quantities. Almost all of the pork produced within its borders that is not consumed on the farm is marketed locally during the late fall and early winter months. Such a practice may result in crowding the local demand for fresh pork to a degree that will depress the price below the point that could be realized by shipping to nearby markets. Such as Buffalo and Pittsburgh. If local market prices fall below prices on the central markets, freight and selling expenses on such markets considered, the co-operative shipment of hogs in carload lots to one of the larger markets would be a project well worth considering.

Worth While Quotation.
"Some people seem to take up all the sorrows of the past; to then they add the burdens of the present; then they look ahead and anticipate a great many more trials than they will ever experience in the future."

NEWS OF OUR NEIGHBORS

CURWENSVILLE

The strike of employes on the two floors in the finishing department of the Penna. H & L. tannery, which was pulled off last week from the fact that the men thought they were discriminated against in the distribution of the raise of wages, came to an end today by most of the men who left their work returning to assume their duties. Some of the men, however, refused to go back and are now laboring in some of the other industries.

R. K. Way's paper delivering boys went on strike Sunday and refused to take their routes unless Mr. Way made an advance on their salary. Way is willing to meet the boys half way and permit them to resume their respective routes next Sabbath.

Miss Irene McKenrick will be one of the Curwensville people who will represent the town as a juror at court next week.

Harvey Smith, Jr., employed in the office at the Crescent Refractories brick plant, was reported as being quite ill at his home yesterday.

George Kittleberger accompanied S. C. Watts to Juniata last Friday to visit his sister Mrs. Salome Watts, who has been ill at the home of a sister in that place. She is in a quite serious condition, being unable to leave her bed for any length of time, and can only move about at all by using a cane and crutch. This is not very encouraging news for her many Curwensville friends who have been living in the hope that she could be

brought to her home at an early date.

Curwensville barbers have gone into an agreement by which the hair cutting and shaving will be advanced a notch, the same to take effect on and after the 15th day of the present month.

This place was visited by a dandy rain yesterday afternoon and evening. An autoist arriving in town a little after four o'clock reported that at Reams and beyond, the storm had terrific force and that trees were uprooted and thrown across the highway, and that large limbs were being strewn so thickly that he was afraid every minute that his machine would be wrecked. Rain, he said, did not wait to come down in drops but landed in sheets. He was so busy in getting out of harm's way that he did not even have time to say the first dozen lines of the Lord's prayer. We have his word for it.

It is a peculiar state of affairs, but true nevertheless, that when laborers and mechanics are fortunate enough in securing a small lift in their wages, everything else moves up to meet it. Groceries advance the price, the clothier, the restorant and boot and shoe men all move prices in accordance to meet the raise. Even axle grease goes up a cent or two. Then how does the wage advance benefit the men for whom it was intended.

Miss Ruth Owens, a resident of Bigler, was a Sunday guest of Mr. and Mrs. Harry Leathers, Naulton.

PUBLIC HEARING TO BE GIVEN TO EFFORT TO DROP DAUGHERTY

Washington, D. C., Sept. 12.—A formal hearing, probably open to the press and public, will be held soon in the impeachment proceedings started against Attorney General Daugherty by Representative Keller, Minn., Republican, Chairman Volstead, of the House Judicial Committee, said today. Before the hearing Volstead said he would see Keller and see what evidence he had and then call the committee together. Keller said he hoped he had enough evidence to convince the committee that Daugherty should be removed from office.

ATTORNEY GENERAL DAUGHERTY SUBJECT OF BITTER ATTACK

Chicago, Ill., Sept. 12.—"Attorney General Daugherty's attempt to fasten the blame for violence in connection with the railroad strike on union officials is the most outrageous invasion of individual rights ever carried out under the cloak of a court of justice," Donald Richberg, union attorney, declared in Federal court today. Richberg dramatically waved a copy of a newspaper containing a statement issued by the Attorney General, which he used as the basis of a sensational attack upon the Attorney General.

"This statement is a gross criminal libel and an infringement on the rights of the individual and in contempt of court," Richberg shouted. "If it was perpetrated by an individual instead of by the man who is supposed to be the chief law-enforcing officer of the nation, he would be prosecuted for defamation of character."

THIRTY THOUSAND WAR REFUGEES NOW FACE STARVATION

Smyrna, Greece, Sept. 12.—Thirty thousand refugees here are foodless and the entire population of 700,000 faces famine within a week unless supplies are furnished, H. G. Jacquith, director of Near East relief, stated today. Several hundred thousand persons, mostly Christians, were swept from Smyrna before the armies of the victorious Turks. Before the Turks arrived most of the food had been consumed and part of it carried away by the fleeing Greeks. It was feared that an epidemic would break out which would take the lives of the 700,000 persons who are huddled together in this city. Bluejackets of the United States, Great Britain, France and Italy were on patrol and doing everything possible to protect lives and property.

ONE MAN KILLED, TWENTY INJURED IN \$50,000 FIRE

Baltimore, Md., Sept. 12.—One fire captain was killed and twenty firemen were injured in a fire and explosion in the William Beeler Umbrella plant here early today. Soon after the first streams of water were playing on the fire an explosion occurred and firemen were blown across Lexington street and the blaze reached some of the fire apparatus in front of the building. The damage will probably reach \$50,000.

GRAND JURY ADDS TO WHAT HAS GONE BEFORE

Passes On 75 New Criminal Cases And Makes Same Recommendations Over Again.

WANT A CLEAN-UP

"The moving finger writes, and having writ marches on," and succeeding Grand Juries ad lib find the same things to complain of, make the same recommendations, everybody appears to be satisfied to "just let 'er rip," and there you are, but here is the report of the last Grand Jury to pass upon things necessary to be done in and about the Court House and other County buildings. About the only change from the findings of the last several "grand inquirers" is in the number of bills of indictment—that changes each three months. But here's what the September serial finds is necessary to be done. This Grand Jury filed this report on Saturday:

Grand Jury's Report
We, the Grand Jury, inquiring in and for Clearfield county, respectfully report that we have passed upon 75 bills of indictment, of which 39 were returned "true bills" and 36 "not true bills."

Visited County Buildings
We have visited the county buildings and submit the following recommendations concerning same:
The Jail:—We recommend that quarter inch mesh wire screen be placed over windows; that women's room and children's room be painted and plaster repaired and two chairs be supplied woman's room.

County Home:—The woodwork on outside should be painted, repairs made to front porch and a new floor laid in Women's Department; also windows in Men's Ward be replaced and water tank removed; that twelve dozen white porcelain cups be purchased, also some new bedspreads and mattresses. The barn bridge is also in need of repairs.

We find that the County Home is clean and sanitary and everything kept in a cleanly condition.

The Court House:—The Court House from cellar to attic is greatly in need of a vigorous soap and hot water bath.

The Ladies Waiting Room is badly in need of some chairs.

The Grand Jury Room should have the present floor rug replaced by a linoleum rug, the table recovered, new chairs supplied and the old chairs placed in the lobby for the accommodation of witnesses and litigants.

The present traverse jury room should be thrown together for use as a court room and jury rooms. It is supplied on the third floor of the building.

The Law Library:—Is badly in need of new rugs and a general cleaning up.

The thank of the Grand Jury are hereby extended to Judge Bell, District Attorney Arnold, for courtesies shown and to J. M. Rowles, tipstaff, and other court officers for services rendered.

FRED D. OSBURN
Foreman
M. C. LONDON, Secretary.

NY FORD WORKER SMELLING OF LIQUOR WILL LOSE HIS JOB

Detroit, Sept. 11.—The 70,000 men employed by the Ford Motor Company here were under orders from Henry Ford today to leave all forms of liquor, wine and beer alone at all times, under penalty of losing their jobs.

Asserting that drinking among certain of his employees recently had been the cause of accidents in the Ford plants, the manufacturer issued a statement declaring that any of his workmen whose breaths smelled of liquor, who were found to be carrying liquor or who were found to have it in their home would be dismissed at once.

Mr. Henry Ford left yesterday for Bucknell College where he is enrolled as a student.

GRUESOME FIND IN MISSOURI RIVER AT KANSAS CITY, MO.

Discovery of Bodies of 2 Daughters In River Results In The Arrest Of Father.

ANOTHER MISSING

Kansas City, Mo., Sept. 12.—With the bodies of two girls dragged from the Missouri River partially identified as the daughters of Tony Dinello, shantymen, authorities today began seeking details of the mysterious disappearance of a third child, Julia, the eldest child, has not been heard from since she disappeared two years ago, another daughter, Angelina, told the police. Julia, who the father says is married and lives in Pittsburg, Pa., never has been heard from since she left. Partial identification of the two bodies was made by Dinello, who was returned to jail and held on a charge of vagrancy for further investigation. A guard was placed around the shantymen's home in order to watch his wife who has made two attempts to commit suicide.

Kansas City, Mo., Sept. 12.—Tony Dinello, shantymen, today confessed that he murdered his two daughters and threw their bodies into the river to hide his crime.

TARIFF BILL WILL PASS BEFORE WEEK ENDS, IS BELIEF

Washington, D. C., Sept. 12.—The Fordney-McCumber tariff Bill, designated officially as the Tariff Act of 1922, today was returned to the House from conference. After two years in the making the bill in final form was laid before the lower chamber which will consider it tomorrow. Leaders today counted on sending the bill to the Senate Thursday and to the White House soon thereafter. The bill is regarded as the highest tariff ever imposed by an American Congress. The conference, however, slashed materially the high rates in the original Senate bill. Foreign valuation was accepted as the basis for determining rates, except in certain instances. The dye embargo, stricken out by both House and Senate, was reinserted for one year with authority to the President to continue it for a second year.

POPULAR YOUNG PROFESSIONAL MAN CALLED BY DEATH

Dr. Percy L. Showers, one of Clearfield's best known dentists, and a lifelong resident here, passed away at the Clearfield Hospital about 4:30 o'clock Monday afternoon as the result of complications following a surgical operation.

The deceased was a son of the late Joseph S. and Martha Moore Showers and was born in Clearfield in April of 1872. He received his education in the public schools and graduated in dentistry from the University of Pennsylvania. Following his graduation he opened offices here and had built up a lucrative practice. He was an expert dentist and possessed a wide clientele throughout this section.

Dr. Showers was a fine man, possessing a keen sense of humor, and the keenest of loyalty to his friends. He was popular with all who had the pleasure of his acquaintance and his death brings sorrow to a host of warm friends.

He was unmarried and is survived by one sister and two brothers, viz: Mrs. H. P. Bridge, of Clearfield; Ira of Hawk Run and Hepburn, of Washington, D. C.

The funeral will be held from the Bridge home on West Street Thursday morning at 9 o'clock. Interment in Hillcrest cemetery.

WAR AGAIN LOOMS AS TURKS PROGRESS TOWARD BOSPHORUS

Turkey To Demand Return of Constantinople, Which The Allies Will Refuse.

WORST IS FEARED

London, England, Sept. 12.—War between Turkey and the Allies with Constantinople as the prize threatened today. Navy Bey, Turkish delegate in Paris, issued a statement saying that Turkey would demand the return of Constantinople. Invasion of the Constantinople neutral zone would not be permitted, he said. Great Britain, according to word received here, has concentrated her entire Mediterranean fleet in near east waters in preparation for an extreme.

PEACE PLANS ARE HELD UP THROUGH BICKERINGS OF MEN

Chicago, Ill., Sept. 12.—Vigorous objection among union leaders to making a separate peace between the railroad shopmen and individual lines today temporarily held up approval of the plan for a settlement of the railroad strike. The shopmen's advisory committee recessed at noon without taking a vote on the Baltimore peace plan which Best M. Jewell, union president, was said to have accepted. The conference was to be resumed during the afternoon and a decisive action was expected before adjournment tonight.

BRUCE AND FRANCE

Baltimore, Md., Sept. 12.—William Cabell Bruce, Democrat and Senator Joseph I. France, Republican, were nominated for the United States Senate in yesterday's primary.

Born to Mr. and Mrs. Earl Gulich at their home on Turnpike avenue, Monday morning, a 10 pound son.

Mr. and Mrs. M. D. Wilkins, Mr. and Mrs. Ed. Young have returned home from a motor trip to Erie and North East.

PENNSYLVANIA CROPS DOING VERY WELL

The United States Department of Agriculture, Department of Agricultural Economics, makes report thru the office of the Agricultural Statistician of the crop conditions in the State of Pennsylvania, as follows:

Philadelphia, Sept. 12.—Unfavorable weather during August caused a loss to Pennsylvania farmers of over 4,000,000 bushels of corn, 300,000 bushels of oats, 160,000 bushels of buckwheat, and 3,600,000 pounds of tobacco, while potatoes and fruit show a slight increase over August 1 forecast according to the report issued today by G. L. Morgan, U. S. Agricultural Statistician, Bureau of Agricultural Economics.

Corn.
The condition of the crop on September 1 was 86 per cent. of a normal, indicating a yield of 41.7 bushels per acre and a production of 66,277,000 bushels, as compared with 76,272,000 bushels last year, and 63,707,000 bushels, the average production for the past ten years.

Spring Wheat.
The condition of the crop on September 1 was 86 per cent. of a normal, indicating a yield of 17.2 bushels per acre and a production of 258,000 bushels as compared with 225,000 bushels last year, and 270,000 bushels, the average production of the past ten years.

Oats.
The condition of the crop at time of harvest was 87 per cent. of a normal, indicating a yield of 27.5 bushels per acre and a production of 41,467,000 bushels, as compared with 35,283,000 bushels last year, and 38,906,000 bushels, the average production for the past ten years.

Barley.
The condition of the crop on September 1 was 89 per cent. of a normal, indicating a yield of approximately 26.7 bushels per acre and a total production of 320,000 bushels as compared with 280,000 bushels last year, and 287,000 bushels, the average production for the past ten years.

Buckwheat.
The condition of the crop on September 1 was 85 per cent. of a normal, indicating a yield of approximately 19.6 bushels per acre and a production of 4,536,000 bushels as compared with 5,175,000 bushels last year, and 5,310,000 bushels, the average production for the past ten years.

Potatoes.
The condition of white potatoes on September 1 was 83 per cent. of a normal, indicating a yield of 97.9 bushels per acre and a production of 25,856,000 bushels as compared with 21,586,000 bushels last year, and 24,435,000 bushels, the average production for the past ten years. Sweet potatoes: The condition on September 1 was 84 per cent. of a normal, indicating an average yield of 117.6 bushels per acre and a production of 225,000 bushels as compared with 218,000 bushels last year, and 209,000 bushels, the average production for the past ten years.

(Continued on Page 2).

MRS. HARDING SEEMS BE SAFELY THRU CRISIS OF ILLNESS

Washington, D. C., Sept. 12.—The crisis of the grave illness of Mrs. Harding seems to have passed, the six attending physicians reported at 9:42 a. m. today in an official bulletin. The bulletin read:

"Mrs. Harding's condition at 8 a. m.—Temperature 98.8, pulse 94, respiration 32. Early part of the night restless, latter part comfortable. General appearance improved. Enlargement due to the nephrosis decreasing. Crisis seems to have passed. Surgical proceeding seems unnecessary for the present."

"C. E. SAWYER."
The bulletin shows that Mrs. Harding this morning had near normal temperature.

CONFEREES AGREE UPON BONUS BILL

Washington, Sept. 11.—Conferees on the soldier bonus bill reached an agreement late today, and it was announced the measure would be reported tomorrow to the House. It will not be called up there, however, until after the conference report on the tariff bill has been disposed of which may be on Wednesday or Thursday. After the House acts, the bonus will go to the Senate, where also it is to be put behind the tariff.

Four Changes

Four major changes were made in the bill in conference. They were: Elimination of the Simmons amendment authorizing the financing of the bonus out of interest from the foreign debt.

Elimination of the land reclamation feature, which, under the Senate plan, would have involved an expenditure of \$550,000,000.

Eliminating of the time in which veterans might file applications for a bonus to January 1, 1928.

Acceptance of the House provision fixing the amount to be advanced for farm or home aid to the amount of the adjusted service credit increased by 25 per cent in place of the Senate plan of amounts ranging from 100 per cent of the adjusted service credit if the application were made in 1923 to 140 per cent. if application were made in 1928 or thereafter.

PHILIPSBURG MEN ARE THE VICTIMS OF AUTO SMASHUP

New York Central Passenger Train Smashes Their Car at Clearfield Creek Crossing.

IS NARROW ESCAPE

An Essex Sedan occupied by Tex Rice and I. Groskins, Philipsburg brokers, was struck by the Williamsport passenger train on the New York Central railroad at the Clearfield Creek crossing about 5 o'clock last evening. Rice, who owned the car, was driving from Philipsburg. When he approached the crossing, according to the watchman on the Pennsylvania bridge nearby, the car was halted momentarily just before it reached the railroad tracks. Then the driver appeared to think he could beat the train across. He stepped on the gas and—almost did it.

The pilot of the engine struck the car about the middle and smashed the rear end to pieces. The front end was but little damaged, while the occupants very luckily escaped with but slight injuries. Rice had his right knee bruised and sustained a cut over the right eye. Groskins had his nose very badly lacerated and was also bruised about the leg and side. Both men were placed upon the train and taken down to Morrisdale, where they were taken to Philipsburg by trolley. They are able to be about in their room at the Hotel Philips today.

COMMERCIAL CLUB ENTERTAINS PENN STATE'S BIG COACH

The regular meeting of the Commercial Club was held at Jordan's last evening with about 75 members and guests attending. The speaker of the evening was the famed Hugo Bezdek of State College. As the producer of unbeaten athletic teams, especially foot ball, he is known throughout the nation and everyone was so anxious to see him and hear what he had to say that they waited over an hour for his arrival. The storm had delayed Bezdek's party in coming by auto from State College.

President Frantz had no trouble in holding the attention of the members however, as there was considerable business to be transacted and a lively discussion developed on several of the subjects. The effort to have street signs placed, at least on our principal streets, is to be pushed before Council as the new State Highway markers will only follow that that route thru town. Supt. Westcott is at this time organizing a gang to erect the highway markers.

A special Post Office Committee was appointed to immediately take up the matter of better facilities here and the appointment of an experienced man as postmaster. There seems to be little hope of any man improving the service here without better equipment and more assistance.

It was decided to utilize the Commercial Club Booth at the fair for a display of products "made in Clearfield" by members of the Club. A committee was named to confer with the Clearfield Bill Posting Co., with reference to the large sign at the Leonard Crossing of the P. R. R.

Jim Fletcher made his maiden speech as a baby member and it was light there with spirit and enthusiasm for the club and the old town "Dudley Way" led some singing but it did not come up to Sam Womert's ideas so Sam got up on a chair and drew forth a still better effort at close harmony.

With the arrival of Mr. Bezdek, the State College aggregation whooped it up with a yell or two and the club then listened to a decidedly interesting talk. Maintaining high ideals, keeping physically fit, and keeping on the sunny side, were the essentials to making better workers and fighters in community service as well as on the gridiron, he said. The talk was interspersed with many interesting anecdotes of the speaker's life and he also pleaded for our support to a Greater State College.

REPUBLICAN SWEET ELECTS HALE AND CURTIS BY 28,000

Augusta, Me., Sept. 12.—Almost complete returns from State elections show Frederick Hale has been elected over his Democratic opponent Oakley Curtis by at least 28,000 votes. Governor Percival Baxter won over W. R. Tattersall, Democrat, by more than 28,000 votes.

WORLD WAR VETERAN VICTIM OF TRAGIC MINE ACCIDENT

DuBois, Sept. 11.—Thomas L. Evans, fireboss at the No. 1 shaft of the Buffalo & Susquehanna Railroad Company and a popular young World War Veteran, was the victim of a tragic accident at No. 1 Shaft early this morning.

With Theodore Engle, another fire boss, he was riding out of the mines on a motor at 6:20 o'clock when a flash caused by a short circuit in the machine caused him to lose his balance and fall in front of the machine.

The two fire bosses had just completed their daily inspection of the mines, prior to the arrival of the miners, and had mounted the motor. Mr. Evans was driving the machine, sitting upon the front end and riding backwards, according to the official reports of the accident. The machine was approaching the bottom of the shaft when a short circuit caused a flash from which Mr. Evans naturally jerked backward. In this way he became overbalanced and fell in front of the ten-ton machine and had his life crushed out of him in a moment.

His partner went to his aid, stopping the motor and picking up the body but life was extinct and physicians who were summoned, were not needed.

The remains were removed to the N. R. Moore undertaking parlors and prepared for burial.

BAKER MAKES REPLY TO SLAM GIVEN BY HISTORY RECORDER

Cleveland, Ohio, Sept. 12.—Newton D. Baker, former Secretary of War, today placed his record during the world's conflict on the scales of justice opposite the adverse description published in a supplement to the Encyclopedia Britannica recently. It was Baker's first public statement in connection with the criticism. The statement said in part: The American army won the war, the American people, by their sacrifice and ideals sustained the army and ennobled the cause. The glory of it is a common possession and is a great national tradition. I am deeply interested in gathering the fruits of this victory as justice and peace have gone forward, but I have little interest in the distribution of individual praise or blame.

CAMPAIGNING IN MCKEAN COUNTY

Hon. W. I. Swoope is campaigning in McKean County the latter part of the week and in company with the County Chairman of McKean County will visit Kane, Ludlow, Bradford and the County Fair at Smethport.

Bob Armstrong went to State College today, where he will enroll as a student in the Freshman class.

CROP REPORT

(Continued from Page One)
for the past five years.

Tobacco.

The condition on September 1 was 84 per cent. of a normal, indicating an average yield per acre of 1361 pounds and a production of 55,793,000 pounds as compared with 61,320,000 pounds last year, and 55,611,000 pounds, the average production for the past ten years.

Hay.

The preliminary estimate of the average yield per acre of all tame hay is 1.42 tons and the production, 4,382,000 tons, as compared with 3,630,000 tons last year, and 4,243,000 tons, the average production for the past ten years. The quality of this year's crop was 91 per cent. of a normal as compared with 86 per cent. last year, and 90 per cent., the average quality for the past ten years. Timothy: The average yield per acre of timothy this year is estimated at 1.50 tons as compared with 1.25 tons last year, and 1.40 tons, the average yield for the past five years. The acreage harvested is estimated at 2 per cent. less than a year ago. Alfalfa: The average yield per acre this season is estimated at 2.70 tons as compared with 2.55 ton, last year, and 2.60 tons, the average yield for the last five years. The acreage harvested is estimated at 3 per cent. more than last year. Wild hay: The average yield per acre this season is estimated at 1.20 tons, and the production, 29,000 tons, as compared with 23,000 tons, last year, and 22,000 tons, the average production for the past three years. The quality of this season's crop was 87 per cent. of a normal as compared with 85 per cent. last year, and 92 per cent. in 1920.

Apples.

The condition of the total or agri-

cultural crop on September 1 was 62 per cent. of a normal, indicating a production of 11,574,000 bushels as compared with 2,208,000 bushels last year, and 8,768,000 bushels, the average production for the past three years. The commercial crop this season is estimated at 1,234,000 barrels as compared with 221,000 barrels last year, and 842,000 barrels, the average production for the past three years. The commercial crop in the United States was estimated at 32,600,000 barrels, as compared with 21,200,000 barrels last year, and 26,800,000 barrels, the five year average.

Peaches.

The total production of peaches

this season is estimated at 65 per cent. of a normal or 1,560,000 bushels, the average production for the past three years. The quality of this year's crop was 90 per cent. of a normal as compared with 89 per cent. last year and 88 per cent., the average quality for the past ten years.

Pears.

The condition of the crop on September 1 was 65 per cent. of a normal, indicating a production of 520,000 bushels as compared with 220,000 bushels last year, and 495,000 bushels, the average production for the past three years.

Hogs.

The number of hogs on hand for fattening this fall is estimated at 1,072,000 as compared with 1,051,000

last year, and 1,083,000 in 1920.

Wool.

The total weight of this year's clip was estimated at 3,337,000 pounds as compared with 3,103,000 pounds last year, and 3,582,000 pounds in 1920.

Other Crops.

The condition of other crops on September 1, the condition last year, and the average condition for the past ten years are as follows: Cloverseed, 85, 78, 81; millet 89, 93 90; pastures 80, 82, 90; grain sorghum 60, 87, 87; peas 87, 87, 90; beans 90, 83, 88; tomatoes 93, 84, 86; cabbage 87, 74, 86; onions 89, 83, 88; grapes 95, 38, 76. The total production of watermelons is estimated at 82 per

cent. of a normal, compared with 84 per cent. last year, and 79 per cent., the average production for the past ten years. Cantaloupes: 84 per cent. as compared with 84 per cent. last year, and 82 per cent., the average production for the past ten years.

Prescription Service

It's a wonderful thing to know that you have such a service as this at your command when there is sickness in your home. Everything is done exactly as you would expect it to be done if you were compounding your own prescription for your own loved ones and the effect of the medicine decided their future.

You have just such a service at your command here.

C. R. BLOOM

KEEP THE KIDDIES STRONG AND STURDY WITH OUR MILK

They have started the school year and are going to have more or less of a strain on their little minds and of course this reflects on their bodies. You can keep their bodies right up to standard requirements and in doing this you will keep their minds keen and active if you'll give them plenty of our pasteurized milk.

When they drink our pasteurized milk they are getting all the nutriment that can possibly come in milk that comes from cows fed for the production of high food-value milk. Then this milk gets the best of care from the time it leaves the farm until it reaches your table. Let the kiddies have plenty of our milk.

Clearfield Dairy Co.

WOMEN DON'T GET HILARIOUS

bending over sinks that are set too low. And that's not all. Modern sanitary fixtures properly installed go a long way toward taking the drudgery out of housework. A post card or a phone call will place our knowledge at your service without obligation to you.

Drop in and see our display of kitchen sinks.

Beauty Hint for Women

For clear skin and bright eyes

Take

Beecham's Pills

Sold everywhere in boxes

10c-12 pills
25c-40 pills
50c-90 pills

When food is only imperfectly digested, it gives rise to fermentation, clogs the bowels, and renders the blood impure. This results in dull eyes, muddy skin, blotches, pimples and other disfiguring marks. Beecham's Pills act immediately on the stomach, liver and bowels; regulate them and keep them in a vigorous condition. They are mild, harmless and dependable. They are compounded of remedies of vegetable origin having great medicinal value.

MEN WANTED

Apply either at new works, Reedsville, or at office, Fourth and Pine streets.

PROGRESS BOYS SEE RICHARDS IN FEATS OF MAGIC

Driggs Season Opens
With Fine Entertainment
Provided By
Wizard.

3 DAY ATTRACTION

Monday evening marked the opening of the Driggs theatre for the 1922-1923 season, with an attraction that proved to be entertaining and together refreshing for a fair sized audience. The attraction was Richards, the world's famous "Wizard," who presented a program of amazing and bewildering illusions, mysteries and scientific wonders, of such character as to stamp him the true "wizard" of today.

Mr. Richards is assisted by Miss Crystal Williams and company, and practically all of his numbers are results of his own conception and invention. Among his most famous numbers are the bewildering double submersion, the girl from nowhere, the lady of the lantern, Solomon's pedestal and the levitation which is a most remarkable achievement. The performance concludes with a "seance" in which persons in the audience are privileged to ask Richards anything new desire to know.

Carrier boys of The Progress were guests of the management at last night's performance and they were astonished beyond measure at the bewildering sights fitting before their eyes. Richards will give another performance this evening, tomorrow afternoon and tomorrow night.

BOZDEK TALKS TO THE SCHOOL BOYS

Last evening Clearfield High's children aspirant were treated to a sport talk by Hugo Bozdek, nationally famous football coach from Penn State College.

Coach Bozdek's message was in earnest. Mr. Bozdek, who came directly from Penn State where he was directing the Nittany Lions training a few hours before, gave the Clearfield High boys the same facts and rules that he applied to his own football squad at State with such brilliant results.

In concluding, Mr. Bozdek said, "I wish you boys a successful season."

C. H. S. Working Hard.
Under the leadership of Captain Frank Witherow, Clearfield High's stellar center rush of 1921, the Red and Black footballers have been drilling for the last three weeks.

After the opening of school, Walter (Fat) Flegal, of Colorado College, and Lee Hills, Penn State Rensselaer last fall, put a small but earnest bunch of material through some important preliminary work. The first day of school, Athletic Director Road of Clearfield High called all football candidates out and since then a squad of thirty-five has been training every evening. The squad and coaches will be taken up at a special article.

ODDS AND ENDS AND THINGS

By J. D. C.

FUNERALS

By ROBERT LOCHRANE
Greatness comes, twice to all; once at birth and once at death. It is greater, however, to be buried than born. There are more present; more flowers; more ceremony. This is a world of commercial values and it costs more to be buried. One is received into life "like a ball tossed from the hand of God." He is a piece of new music, that all want to sing. There is plenty of fuss, but few feathers. Not so at the burial. There fuss and feathers combine. What one fails to do at birth he can make up; but a burial is the last chance. The last opportunity to show off, and few there be who neglect it. A funeral interprets the living more than the dead. It suggests not what the dead was but what we are.

There must always be a display of flowers. Gates ajar, wreaths, crosses, anchors, are all emblems of taste. It matters not what the life was; whether spent in Bethel or brothel, gates and crosses are essential to the exhibit. A sermon is also indispensable—one that reflects honor upon the departed. No spacy abstract, air shooting generality will do; nothing but a straight aim at the target of his many virtues. The minister is sometimes at a loss to know just what these virtues were. Sometimes they are hard to get at; in such cases one must call at the late residence and ascertain. They usually date back several generations and vanish as you approach the present. One can always find what he searches for, and respectability enough for a text exists in most every life.

I once encountered a desolate husband who refused to be comforted. We flourished our brooms and vainly attempted to mop up the ocean of his grief. He only knit his brow and muttered: "She made such excellent bread." When I heard that I too felt like joining the procession. We have too many reformers and too few who know a loaf of bread from a piece of Quincy granite. That Pharaoh lifted up the head from off his chief baker is no wonder. Think of a king suffering the horrors of indigestion. Pharaoh had little to do but eat and sleep and these his chief baker made impossible. Who would want a drove of cattle marching through his bed chamber night after night, just for the pleasure of being a king during the day? He grew tired of the farce and resolved to break the civil

MRS. LULA VANN FULTON, ARK.

Suggests to Suffering Women
the Road to Health

Fulton, Arkansas.—"I used Lydia E. Pinkham's Vegetable Compound for a soreness in my side.

I would suffer so badly every month from my waist down that I could not be on my feet half the time. I was not able to do my work without help. I saw your Vegetable Compound advertised in a newspaper and gave it a fair trial. Now I am able to do my work and my waist down is every month.

I don't even have a headache every month. I cannot praise your Vegetable Compound enough and highly recommend it to those who have troubles like mine. I am willing for these facts to be used as a testimonial to lead all who suffer with female troubles, as I did, to the right road to health."—Mrs. LULA VANN, Box 43, Fulton, Arkansas.

It is this sort of praise of Lydia E. Pinkham's Vegetable Compound, given by word of mouth and by letter, one to another, that should cause you to consider taking this well-known medicine, if you are troubled with such symptoms as painful periods, weak, nervous feelings, miserable pains in your back, and cannot work at certain times.

Here is a woman who is so grateful and glad to be relieved from a painful and nerve racking physical condition that she wishes to tell all sick women.

service rules and remove for cause. The chief baker lost his head and from then on the king slept like a church warden.

My interpretation may not be in harmony with the old traditions of the commentators: I am a higher critic and in perfect accord with modern scholarship. Our friend had lost a most acceptable cook and appreciated his affliction. It sometimes happens that the departed was in early life a church member. This is a fact that nothing but affliction saves no one. Satan himself was once an angel.

If some men didn't die we would never have known how good they were. "This night brings out the stars." He was an active stone in the pastor's sling where he once lived, but he moved, and forgot the way to church. It is always well to lay the responsibility at the nearest church door. The minister didn't call and the deacons were oblivious to his existence. No one visited him but the doctor, and he came by invitation.

All this time his church letter lay in the trunk, a yellow old leaf that fell from the three of his profession twenty years ago. The report of duty neglected became general throughout the congregation. It crowded out Timbuctoo as a subject at the next Ladies' Foreign Missionary society meeting. One of the members had visited the family herself. There was no hearsay in her testimony; she had a specimen of the hot water straight from the kettle. Every minister ought to know where these old church letters are. He ought to smell them; some I believe do.

Sunday is a good day for a funeral. The minister usually has enough to do, but this particular family never bothered him before and in all probability won't again. Besides one late friend belonged to the Supreme Order of the Everlasting Bow-Wows, and the members can best attend on Sunday. They lose no time and would go somewhere anyway. The uniform of the Bow-Wow fraternity is an attractive one. It consists of stars, sashes, feathers and frills. No Indian on the plains is decked more gorgeously. The band is only attainable on Sunday; other days it parades the streets and keeps "Marching Through Georgia."

The Bow-Wows remain outside while the minister attempts to inventory the virtues of the departed. He believes he was a man of a family and there he will be missed. This is a fine thing. Just beyond the ice may be thin. It is well to have two strings always in time for a dirge. The procession to the cemetery is what was termed imposing. The Bow-Wows are in line and so are the small boys. It is a combination of Decoration day, Fourth of July and the day after.

MAMMOTH SALE OF BEAUTIFUL FUR COATS AND FURS TOMORROW

We have arranged for a representative of Wm. Jackson Sons of New York, the country's greatest furriers, to be at our store tomorrow with a wonderful line of furs and fur coats. There are some beautiful garments on display and you'll see something out of the ordinary if you'll drop in tomorrow.

HERE ARE A FEW OF THEM

Muskrats Coats, plain and trimmed, 40 inch length \$150 to \$290.

Raccoon Coats, 40 and 45 inches long, all selected skins, \$250 and \$300.

Jap Mink and Marmot coats plain and Raccoon trimmed, in 40 and 45 inch lengths.

Australian Sealcoats, 36 to 45 inch long, specially priced \$150 to \$175.

French Squirrel coats, 40 inches long for \$150.

A large selection of plain seal and Hudon seal in different lengths, in plain and trimmed models.

ALL THESE COATS CARRY NOT ONLY THE MAKER'S GUARANTEE, BUT WE ADD OURS UNQUALIFIEDLY.

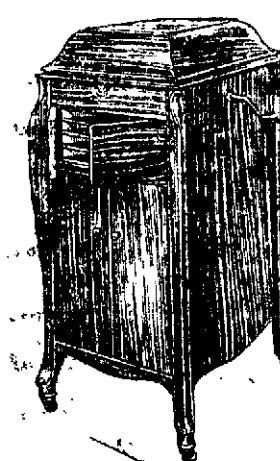

COATS ARE ALL MADE WITH THE LARGE CHIN COLLARS AND HAVE THE NEW MANDARIN SLEEVES. YOU HAVE 75 TO SELECT FROM.

LEITZINGER BROTHERS

on earth" rolled into one. The Clergyman is expected to add his presence. He is not really needed, but there is place assigned him at the end. He shuts the gate when the affair is over. All this in the name of sacrifice and refined civilization. Death rides in a band wagon and the mourners are a part of the procession. Life is a vain show and perhaps the feathers ought only to wait at the grave—Ram's Horn.

Concerning Compensation.
"What is this Emersonian compensation we hear so much about?" asked the Inquisitive Person. "That," said the Clinical Philosopher, "is the doctrine that things are never so bad as they seem, because there are always mitigating circumstances. Compensation is the principle, active in the world, whereby you get a ride to the hospital in the ambulance that knocked you down."

ACHIEVEMENT THE REWARD

Recently Luther Burbank called attention to the difference in reward that accrues to the inventor of a useful device or the author of a popular book and that which is reaped by one who propagates a new and valuable plant. The inventor is protected by patent and is insured payment for the product of his genius.

The author is guarded against piracy of his work by copyright. But the plant wizard, such as Mr. Burbank himself is, is guaranteed no adequate reward. In a much limited way he may profit, but once the improved plant is out of his hands it is beyond his control and yields no return to him whose genius had delved into nature's secrets and had assisted her to produce something better than had hitherto been. While Mr. Burbank himself does not lament this situation, it would be impossible to alter it were he of a mind to do so. Suppose one were to develop a far more productive variety of wheat than has hitherto been grown. The propagator might sell seed at a high price, but he would have competitors the second season in all to whom he sold in the first season, so that the monopoly would cease quickly to exist.

It might be thought that this condition would operate to discourage study and investigation and research to improve plants, but whatever effect might be expected it remains true that development and improvement goes on. Our wheat of today scarcely resembles the crude grain of its earlier development. Corn likewise. There has been improvement and it has been to the benefit of the race that it has been impossible to corner for long any marked betterment in quality and yield of any of the products in which nature has so large a part. Perhaps there was design in this.

We can get along, if need be, without inventions and without books, though not so comfortably, perhaps, but we cannot get along without those things for which we are dependent mainly on nature. Increase of population makes imperative increase in food through quality as well as quantity. Luther Burbank may not reap great financial profit from his discoveries and investigation and experiments, but he has the reward of merit, the satisfaction of having served well his age, and there is no higher reward. It is well that there is one avenue of endeavor where selfishness finds small invitation to enter.

THOSE BOTHERSOME WOMEN

This thing of woman's rights is being carried entirely too far.

In the old days, when a man could collect his two dollars go to the ballot box and show up at home late on election night with a hoarse voice, bulging eyes and a gate unsteady from the excitement of victory or defeat or something of the sort, women knew their places.

They knew then that while they might be shown every consideration, while they might throw away hubby's old brown derby when it was time for him to buy a new one, while they might even buy him cigars with impunity, there was after all just one sovereign in the house, and the brawny old thing that brought home the beefsteak was IT.

But that's all changed now. There was a subtle something about the vote that made for respect. Now women are in on the mysteries of politics, and they have seen what a colossal bluff their husbands had been pulling for all these years.

It's worse this year than at any previous time since the passage of the seventeenth amendment. It has got to the point where a man can't get up any more and orate a little about this broad country of ours, stretching as it does from the rock-bound coasts of Maine to the sun-kissed shores of California, from the pearly lakes of the northland to the waving palms that fringe the Gulf, without a woman wanting to know what was the primary vote in North Dakota, or whether the tariff on wool is higher now than it was in 1894.

The first thing we know, this country's politics is going to have something to do with the practical affairs of its citizens, and then think of the terrible unemployment among the professional politicians!

Not Permanent. When the bride promises to obey she waives her right, but it isn't a permanent waive. — Boston Transcript

Decide the Best You Can. That person who insists upon seeing with perfect clearness before making a decision never does decide.

We'll Add Something To Your Vacation Fund

Even though you practice every sort of economy on your vacation, chances are you return "broke."

Wouldn't it seem good to have enough to "do it right" next year and still have some left over?

Then start a vacation fund today. The amount you save will be increased by the interest we add.

SAYS---

We have been expecting to see in the paper where some coal wagon driver absconded with a ton.

New York police have dangerous jobs. An actor tried to kiss one.

The woman who loves ever hair in her husband's head hates every hair on his shoulder.

It's about equal. Poor dodge autos and rich dodge baby buggies.

What has become of all these crows for the drink habit you used to see advertised?

Turn your back on your troubles and they get up around your neck.

Some girls dress for town as if they thought the place deserted.

Truth has it on fiction. The human tongue has only eleven muscles.

While driving auto or bargain it is safer to keep to the right.

When you see a man climbing the ladder to success you can bet a woman is holding it.

Still sleeves look as if the dressmaker didn't have enough goods.

Since weary makes one bald, what a pity a man can't worry with his face instead of his head.

Boasting in a bungalow is safe compared to cussing out a waitress.

Better national anthem than "Keep the home fires burning" would be "Darling I am growing cold."

Country bred farmer is worth more money

State College, Pa., Sept. 12.—The country bred farmer is worth more than the city bred farmer by about \$50 a year, it was announced today by Dean R. L. Watts, of the School of Agriculture of the Pennsylvania State College.

Dean Watts, who has just completed a study of the salaries of 250 farm-reared agriculturists and the same number of city-reared men who have "gone back to the farm," found that the former receive a larger salary during their first year out of college and in every succeeding year.

The farm-reared graduates of the School of Agriculture reported an average first year's salary of \$1028, while the city-reared graduates report an average average of \$978, the advantage in favor of the former being \$50 a year.

At the present time, the salaries of the first group averaged \$2602 and the second group averaged \$2552, the advantage in favor of the country bred farmer being \$50.

Two hundred young men have applied for admission as new students in the school of agriculture for the college year that opens next Wednesday.

More students regard on the farms and agriculture for practical studies than was the case a decade ago.

Most of those who enter have had farm experience, and all are required to have at least one summer of farm work before graduating.

Sound Heard Round the World.

TESTING ASSOCIATION WORK IN PENNSYLVANIA WILL BE INTERESTING TO CLEARFIELD COUNTY ASS'N MEN

Result Of First Six Months Shows More Than Six Thousand Cows Produced Forty Or More Pounds Of Butter Fat, With Many Above Fifty Pound Mark.

TWENTY THOUSAND COWS ARE ON TEST

The results of cow testing association work in Pennsylvania during the first six months of the year will no doubt be of more than passing interest to Clearfield County farmers who are members of the local association. There are now about fifty of these cow testing groups in operation in every part of the State, representing a total of twenty thousand cows on test. In the report recently received at the Clearfield County Farm Bureau office, it is found that more than six thousand of these cows produced 40 or more pounds of butterfat, one-third of this number having passed the 50-pound mark. About one-third of the twenty thousand cows on test produced over one thousand pounds of milk.

Perhaps the most striking example of the value of the work is the record of unprofitable cows sold, five hundred having been weeded out of the herd and most of them consigned to the butcher's block. Before the end of the year, many more will be consigned to the same fate as a result of the story written in the association records. The report also shows that forty-two pure bred bulls were purchased by members, the new sire in many cases replacing a grade bull that was retarding herd improvement. These interesting facts all tend to show that the dairyman's belief in the application of sound business methods is on the increase. In no other way can he get such sure knowledge of what each cow in his herd is doing, than in the keeping of records as a member of a cow testing association.

"FITTING" FOR THE FAIR IMPORTANT TO ALL EXHIBITORS

Club Members Preparing to Gather In Blue Ribbons And Nothing Should be Left Undone.

DON'T USE TOO MUCH OIL

Many club members, as well as adults, will be showing their pigs at the county fairs this month. You would be surprised to know the number of club members whose pigs won over those of the adults when shown in competition at the fairs last year. Let us try to do even better this year.

Why should I bother showing my pig or hogs at the County Fair? Because it is the best piece of advertising you can do in a year's time. The truth is, you do not show alone for the prize but for the advertising value which showing and winning will give you. It brings your stock to the attention of the prospective buyer.

Last year a number of pigs were oiled before they were shown. This is advisable when done in moderation, but some of the pigs had so much oil on them it fairly dripped from them. It is better to put on oil frequently for a few weeks before the time for showing, then the oil will help to soften up the skin and scurf and give the hair a natural glossy appearance. The following oils can safely be used: Linseed Oil, Machine Oil, Sweet Oil, Low Grade Castor Oil, or the black oil drawn from the tank case of an automobile, and kerosene oil, in sections where it was obtained. Black oil should not be used on Chester White pigs.

You would be surprised to note the difference in the appearance of a pig which has had a long, coarse hair about the ears and face trimmed, which has not. A small pair of scissors are best. Occasionally the hair will break or grow so that the pig will stand up on its toes. A little trimming at the proper places will make the pig to walk and stand a better. Don't cut and judgment must be general, we trim about as you would a horse's hair. Pigs should be shown where there is soft or pasture after this is better still, do it just rain.

Boys and girls have had limited experience in show-

FRANK AND HUFFORD LOOK GOOD AT STATE

State College, Pa., Sept. 11.—Penn State has always been noted for having a strong pair of ends and this year promises to be no exception to the rule, despite the loss of Stan McCollum, one of the best wingmen in the country last year.

The reason for such a statement lies in the showing that has been made thus far by Hap Frank, the Harrisburg boy, who was a substitute last year. Frank did good work in both the Carnegie Tech and Navy games last season when McCollum was hurt. In the preliminary scrimmages this fall, however, the lanky Capitol youth has more than pleased Bezdek with his playing. His specialty is pulling down forward passes, and with two years of varsity competition ahead of him, he should make a great name for himself.

At the other wing, Bezdek will have the old war horse Ross Hufford. The West Virginia boy has been a regular now for two seasons, and although he is now flashy, he is in on every play and rarely misses a tackle. Moreover, Hufford is one of the hardest workers on the squad, and he is nearly always the first man on the field for practice. Today starts the second week of practice at Penn State.

ing their pigs. The main point to keep in mind is to watch the judge. When he wants to see your pig move, be ready to have it walk, or if he wishes to see it standing, try to have it trained so that it will stand still. When you see the judge is no longer interested in your pig drive it off to the side and do not bother him until he wants to see it again. A hurdle is generally used in driving and handling hogs in the show ring. You can easily make one and practice using the hurdle and getting the pig accustomed to it before show time. You can make one of half-inch or heavier boards. It ought to be about three to four feet in length and eighteen to twenty-four inches high, with a handle or some arrangement for holding at the center and top. You walk along holding the hurdle in your hand on the side nearest the pig and thus teach it to go where you wish it to go. A good heavy hurdle is a help to prevent pigs from fighting, as sometimes happens.

Pigs should be crated to be hauled and the most convenient crate is one which opens at both ends. You will appreciate a crate of this type if you have ever tried to back a pig out of a crate when it has decided it does not want to back. If it is necessary to move your pigs a considerable distance it is wise to plan to have them shaded or do the moving in the cool of the morning or evening. The crate or boxes used should not be so tight as to exclude the air. Some people make the mistake of giving the pig a heavy feed before loading to bring to the round-up. This is bad practice, as the pig's stomach is easily upset when hauled or handled much. A light, thick slop is the best feed.

Have record books completely filled in and bring along to the round-up.

BEE KEEPERS HELD INTERESTING MEET AT COURT HOUSE

Professor Rea, extension apiculturist of the Pennsylvania State College, addressed both the morning and afternoon meetings of the Clearfield County Bee Keepers Association on Wednesday, August 23rd. It was the second general meeting of the bee keepers of the county.

During the morning meeting, Professor Rea gave an interesting talk on modern bee keeping, emphasizing the importance of introducing a new stock of gentle bees. Preferably the Italian strain. The Italian queen will average thirty-five hundred eggs every twenty-four hours during the laying season, which is a great deal more than the common queens will do. He stated it will pay to queen every colony every year, and to kill the old queen rather than permit it to be killed after the new queen is admitted. In conclusion he stated that the three essentials in modern bee keeping were, plenty of heat, proper food, and a new queen of the Italian type every year.

During the afternoon meeting, Professor Rea again spoke on the bee industry, as it relates to the entire State, bringing out the interesting fact that Pennsylvania stands well in the lead in the production of honey. He also mentioned another fact that is sad indeed. That is, that the Pennsylvania State College has, at the present time, only one man to take care of the extension work in apiculture, and has no equipment, and not a single colony of bees to experiment with. It is a contention that should be remedied in the near future, and it is hoped that the bee keepers of the State will get behind the movement to install a research department at the Pennsylvania State College for the studying of diseases of bees and other problems confronting the bee keepers.

During the coming month a campaign will be started to raise two million dollars for the college. The bee keepers will be given an opportunity to contribute towards this cause, and it is hoped that upon completion of the campaign, that something definite will be assured to take care of the need of the bee keepers, in the way of research and extension.

At the close of the meeting it was unanimously decided to hold a two-day Institute on Bee Keeping during the month of February, at which time Professor Rea will give illustrated lectures covering the bee industry from beginning to end. These lectures will be interesting not only to the bee keeper but to the general public as well, for the little honey bee is one of the most interesting and most profitable insects on the farm.

These meetings will be advertised and every bee keeper should avail himself of the opportunity to get a thorough knowledge of the industry.

Alphabets Long In Use.
Nearly 200 alphabets, ancient and modern, are known, of which 50 are now in use.

YOU SHOULD ENTER YOUR LIVE STOCK EXHIBITS EARLY

The prospects for a record exhibit of pure bred livestock is brighter than ever before, and the committee is making preparation every day to take care of the exhibits. It behooves every breeder of pure bred livestock to make his entry at once, so that the committee can make the necessary preparation.

The premiums have been increased, and a third added, which is an inducement to every breeder. Let us pull together and make this the largest livestock exhibit in the State. It can easily be done if every one exhibits a few of the best pure-breds.

FEEDING OF HOGS RANKING PROBLEM IN PORK RAISING

There is no other single phase of the hog business that receives quite so much attention as does the problem of feeding. It is equally true that the careful feeder in making up his ration always places particular emphasis on that very necessary constituent of the feed, the protein supplement. Why? Because the common feeds derived from crops produced on the farm are deficient in the nitrogen-containing nutrient. The only protein feed that is produced on the farm and used in its original form as a feed, is milk. Milk in any of its various forms makes a good, cheap protein feed.

Of the protein supplements sold on the market, tankage is perhaps the most commonly used in swine feeding. It is an animal product, the value of which depends entirely upon its grade, as indicated in the percentage of protein contained. The higher grade is usually the most satisfactory because of its greater content of protein and its better preparation. Fish meal has proven to be a better purchase for the feeder of swine in some localities, where meal containing the same amount of protein as a good tankage can be obtained at a lesser cost.

Linseed oil meal has been used as a substitute for tankage at times but being a plant product it is not as satisfactory under all conditions. Oil meal is good when a laxative condition is desired in the individual. While middlings and protein supplements also find occasional use in hog rations, milk, tankage, fish meal, and oil meal are the most valuable and successful protein feeds in use under ordinary conditions.

Circumstances.
Believe only that your circumstances are those most suited to develop your character. They have been selected out of all possible combinations of events and conditions, in order to effect in you the highest finish of usefulness and beauty; they would have been the ones selected by you, if all the wide range of omniscient knowledge had been within reach.—F. B. Meyer

ELECTRIC LIGHTS SHOULD BE PLACED PROPERLY IN PENS

In some instances where Clearfield County farmers have installed electric lights in their poultry houses, the lights are not properly located to bring about the best results. The strength of the lamps, with which the houses are equipped, may also be defeating the purpose of illumination in the economical production of eggs. Where lamps of great power are used, the expense item enters in

CARE OF SOW AND LITTER TIL WEANED MOST IMPORTANT

The one important lesson for Clearfield County farmers in present day swine management is that there is no profit in raising only a small percentage of the litter. Prominent and successful hogmen claim that ninety-five per cent. of the pig losses at farrowing time are preventable. Some of the common causes for such losses are, lack of attention, improper quarters, overfeeding, wrong feeding, and lack of exercise. If the producer would insure himself of a goodly percentage of pigs raised he has only to keep close watch on the sow, give attention when necessary, and use good common sense reasoning.

It is not necessary to make "hot-house" individuals out of the sow and her litter. Twenty-four hours after farrowing, give a thin slop of bran and oats, using milk if the sow is slow in coming into suckling. If the sow is a heavy suckler, do not use milk in the feed for two or three days. The sow should be provided with an outside run and plenty of green feed also. After the bran and oats slop, the sow can be put back on the regular feed. While no one combination can be called the best for this period, a mixture of forty pounds of cornmeal, thirty of middlings, ten of oats, ten of tankage, and five of oil meal will be found to be good. When the pigs are a few days old, the sow should have all she will clean up nicely three times a day.

To prevent thumps, the pigs should be encouraged to take exercise. As soon as they show an inclination to eat, a small creep should be built in one corner of the pen. Place a small, low trough in the creep and keep some dry cornmeal, sifted ground oats and middlings before them all the time. Let them have all they will eat up until weaning time, only making sure that the feed is not allowed to become old, foul and unappetizing to the young pig. The boar pigs may be castrated at six weeks of age without any check in growth, and weaned at eight weeks.

Selecting Cockerels Is Important

The selection or purchase of breeding cockerels is a phase of poultry management that the flock owner usually postpones until a few weeks before the male birds are needed in the spring. In most cases Clearfield County farmers have found the prices high and the supply limited when they try to obtain males just before the breeding season begins. At the present time, however, the selection can be made from a larger number, and at a much more reasonable price. The health and vigor of the young stock are big factors in future development, and purchase at this time permits satisfactory observation in this respect.

It is highly desirable that any Clearfield County farmer who expects to buy breeding males, should place his order within the next few weeks and, if possible, visit the place from which the birds are procured so that he may be sure of the vigor of the stock. While it is true that many young cockerels, showing considerable promise at this time, may prove disappointing as they mature, the early order enables the breeder to make an accurate estimate of the number of birds he must keep in order to supply the demand.

Children In Russia.
Russian peasant women have, on an average, from six to twelve children, of whom about half survive.

RELATION BETWEEN PORK PRODUCTION AND CONSUMPTION IN CLEARFIELD CO. SHOWS NECESSITY FOR GREATER EFFORT

Former County Farm Agent A. T. Kearney Talks Very Entertainingly On This Highly Important Proposition To Clearfield County Farmers; We Raise One-Fourth Our Needs.

ADVOCATES RAISING HOGS TO SHIP

By A. T. KEARNEY (Former County Agent.)

According to the Federal census of 1920 there were 103,236 people in Clearfield County. Judging by the rate of increase during the previous decade, the number at present is undoubtedly in excess of 105,000. The Department of Agriculture estimates that the combined annual consumption of pork and lard in the North Atlantic States is about 80 pounds per capita. These figures would lead to the conclusion that the total consumption of all pork products in the county is about 8,400,000 pounds per year.

The 14th census reports that there are 10,660 hogs on Clearfield County farms on January 1, 1920. This is about three thousand less than was reported by the 13th census, on April 1, 1910. Of the number reported 7,508 were given as being under six months of age. These figures would indicate that the total slaughter of hogs would not exceed 10,000 per year. The average dressed weight of hogs produced in the county is probably around 175 pounds per head, which, applied to the above figure of 10,000 would result in an annual production of 1,750,000 pounds of pork.

If these figures are even approximately correct, it is evident that this county produces less than 25 per cent. of the pork it consumes. The farm population of the county is in the neighborhood of 15,000 people, which would indicate that at least half of the pork produced in the county is consumed on farms. The remainder left for market, which is probably somewhat less than a million pounds, is marketed chiefly during the fall and early winter months and is sold largely through meat markets to consumers in the form of fresh pork.

It would appear from the above statistics that Clearfield County is dependent on outside sources for at least three-fourths of its total supply of pork products and almost its entire supply of cured pork products, such as bacon, hams, and lard. Neighboring counties to the west are in somewhat the same condition, and the State of Pennsylvania as a whole is far from being self-supporting in production of pork products. The deficiency in supply must, therefore, come largely from without the State.

It is estimated that 90 per cent. of the commercial supply of hogs comes from the Corn Belt States, and when it is considered that the eastern States of the Corn Belt group are little more than self-supporting in the production of pork products, it is apparent that a very large percentage of the pork consumed in Clearfield County comes from hogs grown in such States as Iowa, Nebraska, and Missouri.

Clearfield County has never produced hogs in commercial quantities. Almost all of the pork produced within its borders that is not consumed on the farm is marketed locally during the late fall and early winter months. Such a practice may result in crowding the local demand for fresh pork to a degree that will depress the price below the point that could be realized by shipping to nearby markets, such as Buffalo and Pittsburgh. If local market prices fall below prices on the national markets, freight and selling expenses on such markets considered, the co-operative shipment of hogs in carload lots to one of the larger markets would be a project well worth considering.

In this practice of hogging-off corn, the pigs should be gradually accustomed to the green corn before turning them into the field. They should not be put in until two or three days before the corn is ready to cut. If only a part of the corn is to be given over to the hogs, a temporary fence should be constructed to confine them in the desired area. An acre of average corn will ordinarily be sufficient to finish five to seven 125-pound hogs for market. A constant supply of fresh water should be at hand, and the pigs should also be given some protein supplement, preferably tankage, which may be placed in a self-feeder and kept before them at all times.

Worth While Quotation.

TESTING ASSOCIATION WORK IN PENNSYLVANIA WILL BE INTERESTING TO CLEARFIELD COUNTY ASS'N MEN

Result Of First Six Months Shows More Than Six Thousand Cows Produced Forty Or More Pounds Of Butter Fat, With Many Above Fifty Pound Mark.

TWENTY THOUSAND COWS ARE ON TEST

The results of cow testing association work in Pennsylvania during the first six months of the year will no doubt be of more than passing interest to Clearfield County farmers who are members of the local association. There are now about fifty of these cow testing groups in operation in every part of the State, representing a total of twenty thousand cows on test. In the report recently received at the Clearfield County Farm Bureau office, it is found that more than six thousand of these cows produced 40 or more pounds of butterfat, one-third of this number having passed the 50-pound mark. About one-third of the twenty thousand cows on test produced over one thousand pounds of milk.

Perhaps the most striking example of the value of the work is the record of unprofitable cows sold, five hundred having been weeded out of the herd and most of them consigned to the butcher's block. Before the end of the year, many more will be consigned to the same fate as a result of the story written in the association records. The report also shows that forty-two pure bred bulls were purchased by members, the new sire in many cases replacing a grade bull that was retarding herd improvement. These interesting facts all tend to show that the dairyman's belief in the application of sound business methods is on the increase. In no other way can he get such sure knowledge of what each cow in his herd is doing, than in the keeping of records as a member of a cow testing association.

"FITTING" FOR THE FAIR IMPORTANT TO ALL EXHIBITORS

Club Members Preparing to Gather In Blue Ribbons And Nothing Should be Left Undone.

DON'T USE TOO MUCH OIL

Many club members, as well as adults, will be showing their pigs at the county fairs this month. You would be surprised to know the number of club members whose pigs won over those of the adults when shown in competition at the fairs last year. Let us try to do even better this year.

Why should I bother showing my pig or hogs at the County Fair? Because it is the best piece of advertising you can do in a year's time. The truth is, you do not show alone for the prize but for the advertising value which showing and winning will give you. It brings your stock to the attention of the prospective buyer.

Last year a number of pigs were oiled before they were shown. This is advisable when done in moderation, but some of the pigs had so much oil on them it fairly dripped from them. It is better to put on oil frequently for a few weeks before the time for showing, then the oil will help to soften up the skin, and scurf and give the hair a natural glossy appearance. The following oils can safely be used: Linseed Oil, Machine Oil, Sweet Oil, Low Grade Castor Oil, or the black oil drawn from the tank case of an automobile, and use oil in sections where it is obtained. Black oil should not be used on Chester White pigs.

You would be surprised to see the difference in the appearance of a pig which has had a long, coarse hair about the ears, tail, ears and face trimmed, and one which has not. A small pair of blunt scissors are best for this work. Occasionally the ears of a pig will break or grow out of proportion so that the animal does not stand up on its toes; it should. A little trimming of the hoofs at the proper places will cause the pig to walk and much better. Don't cut too deep, and judgment must be used. In general, we trim about the same as you would a horse's hoof. This should be done at least a week before you show your pig, so that any soreness or lameness will pass before the round-up is held. Pigs should be put where there is soft ground, or pasture after this is done, or better still, do it just after a rain.

Many boys and girls have had very limited experience in show-

FRANK AND HUFFORD LOOK GOOD AT STATE

State College, Pa., Sept. 11.—Penn State has always been noted for having a strong pair of ends and this year promises to be no exception to the rule, despite the loss of Stan McCollum, one of the best wingmen in the country last year.

The reason for such a statement lies in the showing that has been made thus far by Hap Frank, the Harrisburg boy, who was a substitute last year. Frank did good work in both the Carnegie Tech and Navy games last season when McCollum was hurt. In the preliminary scrimmages this fall, however, the lanky Capitol youth has more than pleased Bezdek with his playing. His specialty is pulling down forward passes, and with two years of varsity competition ahead of him, he should make a great name for himself.

At the other wing, Bezdek will have the old war horse Ross Hufford. The West Virginia boy has been a regular now for two seasons, and although he is now flashy, he is in on every play and rarely misses a tackle. Moreover Hufford is one of the hardest workers on the squad, and he is nearly always the first man on the field for practice. Today starts the second week of practice at Penn State.

ing their pigs. The main point to keep in mind is to watch the judge. When he wants to see your pig move, be ready to have it walk, or if he wishes to see it standing, try to have it trained so that it will stand still. When you see the judge is no longer interested in your pig drive it off to the side and do not bother him until he wants to see it again. A hurdle is generally used in driving and handling hogs in the show ring. You can easily make one and practice using the hurdle to it before show time. You can make one of half-inch or heavier boards. It ought to be about three to four feet in length and eighteen to twenty-four inches high, with a handle or some arrangement for holding at the center and top. You walk along holding the hurdle in your hand on the side nearest the pig and thus teach it to go where you wish it to go. A good heavy hurdle is a help to prevent pigs from fighting, as sometimes happens.

Pigs should be crated to be hauled and the most convenient crate is one which opens at both ends. You will appreciate a crate of this type if you have ever tried to back a pig out of a crate when it has decided it does not want to back. If it is necessary to move your pigs a considerable distance it is wise to plan to have them shaded or do the moving in the cool of the morning or evening. The crate or boxes used should not be so tight as to exclude the air. Some people make the mistake of giving the pig a heavy feed before loading to bring to the round-up. This is bad practice, as the pig's stomach is easily upset when hauled, or handled much. A light, thick slop is the best feed.

Have record books completely filled in and bring along to the round-up.

BEE KEEPERS HELD INTERESTING MEET AT COURT HOUSE

Professor Rea, extension apiculturist of the Pennsylvania State College, addressed both the morning and afternoon meetings of the Clearfield County Beekeepers Association on Wednesday, August 23rd. It was the second general meeting of the beekeepers of the county.

During the morning meeting, Professor Rea gave an interesting talk on modern beekeeping, emphasizing the importance of introducing a new stock of general bees. Preferably the Italian strain. The Italian queen will average thirty-five hundred eggs every twenty-four hours during the laying season, which is a great deal more than the common queens will do. He stated, it will pay to queen every colony every year, and to kill the old queen rather than permit it to be killed after the new queen is admitted. In conclusion he stated that the three essentials in modern beekeeping were, plenty of heat, proper food, and a new queen of the Italian type every year.

During the afternoon meeting, Professor Rea again spoke on the bee industry, as it relates to the entire State, bringing out the interesting fact that Pennsylvania stands well in the lead in the production of honey. He also mentioned another fact that is sad indeed. That is, that the Pennsylvania State College has, at the present time, only one man to take care of the extension work in apiculture, and has no equipment, and not a single colony of bees to experiment with. It is a condition that should be remedied in the near future, and it is hoped that the beekeepers of the State will get behind the movement to install a research department at the Pennsylvania State College for the studying of diseases of bees and other problems confronting the beekeepers.

During the coming month a campaign will be started to raise two million dollars for the college. The beekeepers will be given an opportunity to contribute towards this cause, and it is hoped that upon completion of the campaign, that something definite will be assured to take care of the need of the beekeepers, in the way of research and extension.

At the close of the meeting it was unanimously decided to hold a two-day Institute on Beekeeping during the month of February, at which time Professor Rea will give illustrated lectures covering the bee industry from beginning to end. These lectures will be interesting not only to the beekeeper but to the general public as well, for the little honey bee is one of the most interesting and most profitable insects on the farm.

These meetings will be advertised and every beekeeper should avail himself of the opportunity to get a thorough knowledge of the industry.

Alphabets Long In Use.

Nearly 200 alphabets, ancient and modern, are known, of which 50 are now in use.

ELECTRIC LIGHTS SHOULD BE PLACED PROPERLY IN PENS

In some instance where Clearfield County farmers have installed electric lights in their poultry houses, the lights are not properly located to bring about the best results. The strength of the lamps, with which the houses are equipped, may also be defeating the purpose of illumination in the economical production of eggs. Where lamps of great power are used, the expense item enters in,

YOU SHOULD ENTER YOUR LIVE STOCK EXHIBITS EARLY

The prospects for a record exhibit of pure bred livestock is brighter than ever before, and the committee is making preparation every day to take care of the exhibits. It behooves every breeder of pure bred livestock to make his entry at once, so that the committee can make the necessary preparation. The premiums have been increased, and a third added, which is an inducement to every breeder. Let us pull together and make this the largest livestock exhibit in the State. It can easily be done if every one exhibits a few of the best pure-breds.

FEEDING OF HOGS RANKING PROBLEM IN PORK RAISING

There is no other single phase of the hog business that receives quite so much attention as does the problem of feeding. It is equally true that the careful feeder in making up his ration always places particular emphasis on that very necessary constituent of the feed, the protein supplement. Why? Because the common feeds derived from crops produced on the farm are deficient in the nitrogen-containing nutrient. The only protein feed that is produced on the farm and used in its original form as a feed, is milk. Milk in any of its various forms makes a good, cheap protein feed.

Of the protein supplements sold on the market, tankage is perhaps the most commonly used in swine feeding. It is an animal product, the value of which depends entirely upon its grade, as indicated in the percentage of protein contained. The higher grade is usually the most satisfactory because of its greater content of protein and its better preparation. Fish meal has proven to be a better purchase for the feeder of swine in some localities, where meal containing the same amount of protein as a good tankage can be obtained at a lesser cost.

Linsed oil meal has been used as a substitute for tankage at times but being a plant product it is not as satisfactory under all conditions. Oil meal is good when a laxative condition is desired in the individual. While middlings and protein supplements also find occasional use in hog rations, milk, tankage, fish meal, and oil meal are the most valuable and successful protein feeds in use under ordinary conditions.

Circumstances. Believes only that your circumstances are those most suited to develop your character. They have been selected out of all possible combinations of events and conditions, in order to effect in you the highest finish of usefulness and beauty; they would have been the ones selected by you, if all the wide range of omniscient knowledge had been within reach.—F. B. Meyer

and where weak lamps are in use there is not sufficient intensity of light and the activity of the birds is thereby limited. Recent experiments show that a standard forty watt Mazda lamp in a cone reflector sixteen inches in diameter and four inches high, hung six feet above the floor, gives good results. These lights should be located ten feet apart, along a line midway between the front of the house and the front of the dropping board. One lamp gives sufficient light for two hundred square feet of floor space, according to information from the Pennsylvania State College poultry specialists.

CARE OF SOW AND LITTER TIL WEANED MOST IMPORTANT

The one important lesson for Clearfield County farmers in present day swine management is that there is no profit in raising only a small percentage of the litter. Prominent and successful hogmen claim that ninety-five per cent. of the pig losses at farrowing time are preventable. Some of the common causes for such losses are, lack of attention, improper quarters, overfeeding, wrong feeding, and lack of exercise. If the producer would insure himself of a goodly percentage of pigs raised he has only to keep close watch on the sow, give attention when necessary, and use good common sense reasoning.

It is not necessary to make "hot-house" individuals out of the sow and her litter. Twenty-four hours after farrowing, give a thin slop of bran and oats, using milk if the sow is slow in coming into suckling. If the sow is a heavy suckler, do not use milk in the feed for two or three days. The sow should be provided with an outside run and plenty of green feed also. After the bran and oats slop, the sow can be put back on the regular feed. While no one combination can be called the best for this period, a mixture of forty pounds of cornmeal, thirty of middlings, ten of oats, ten of tankage, and five of oil meal will be found to be good. When the pigs are a few days old, the sow should have all she will clean up nicely three times a day.

To prevent thumps, the pigs should be encouraged to take exercise. As soon as they show an inclination to eat, a small creep should be built in one corner of the pen. Place a small, low trough in the creep and keep some dry cornmeal, sifted ground oats and middlings before them all the time. Let them have all they will eat up until weaning time, only making sure that the feed is not allowed to become old, foul and unappetizing to the young pig. The boar pigs may be castrated at six weeks of age without any check in growth, and weaned at eight weeks.

Selecting Cockerels Is Important

The selection or purchase of breeding cockerels is a phase of poultry management that the flock owner usually postpones until a few weeks before the male birds are needed in the spring. In most cases Clearfield County farmers have found the prices high and the supply limited when they try to obtain males just before the breeding season begins. At the present time, however, the selection can be made from a larger number, and at a much more reasonable price. The health and vigor of the young stock are big factors in future development, and purchase at this time permits satisfactory observation in this respect.

It is highly desirable that any Clearfield County farmer who expects to buy breeding males, should place his order within the next few weeks and, if possible, visit the place from which the birds are procured so that he may be sure of the vigor of the stock. While it is true that many young cockerels, showing considerable promise at this time, may prove disappointing as they mature, the early order enables the breeder to make an accurate estimate of the number of birds he must keep in order to supply the demand.

RELATION BETWEEN PORK PRODUCTION AND CONSUMPTION IN CLEARFIELD CO. SHOWS NECESSITY FOR GREATER EFFORT

Former County Farm Agent A. T. Kearney Talks Very Entertainingly On This Highly Important Proposition To Clearfield County Farmers; We Raise One-Fourth Our Needs.

ADVOCATES RAISING HOGS TO SHIP

By A. T. KEARNEY
(Former County Agent.)

According to the Federal census of 1920 there were 103,236 people in Clearfield County. Judging by the rate of increase during the previous decade, the number at present is undoubtedly in excess of 105,000. The Department of Agriculture estimates that the combined annual consumption of pork and lard in the North Atlantic States is about 80 pounds per capita. These figures would lead to the conclusion that the total consumption of all pork products in the county is about 8,400,000 pounds per year.

The 14th census reports that there are 10,660 hogs on Clearfield County farms on January 1, 1920. This is about three thousand less than was reported by the 13th census, on April 1, 1910. Of the number reported 7,508 were given as being under six months of age. These figures would indicate that the total slaughter of hogs would not exceed 10,000 per year. The average dressed weight of hogs produced in the county is probably around 175 pounds per head, which, applied to the above figure of 10,000 would result in an annual production of 1,750,000 pounds of pork.

If these figures are even approximately correct, it is evident that this county produces less than 25 per cent. of the pork it consumes. The farm population of the county is in the neighborhood of 15,000 people, which would indicate that at least half of the pork produced in the county is consumed on farms. The remainder, left for market, which is probably somewhat less than a million pounds, is marketed chiefly during the fall and early winter months and is sold largely through meat markets to consumers in the form of fresh pork.

It would appear from the above statistics that Clearfield County is dependent on outside sources for at least three-fourths of its total supply of pork products and almost its entire supply of cured pork products, such as bacon, hams, and lard. Neighboring counties to the west are in somewhat the same condition, and the State of Pennsylvania as a whole is far from being self-supporting in production of pork products. The deficiency in supply must, therefore, come largely from without the State.

It is estimated that 90 per cent. of the commercial supply of hogs comes from the Corn Belt States, and when it is considered that the eastern States of the Corn Belt group are little more than self-supporting in the production of pork products, it is apparent that a very large percentage of the pork consumed in Clearfield County comes from hogs grown in such States as Iowa, Nebraska, and Missouri.

HOGGING-OFF CORN WAS PROFITABLE TO MANY FARMERS

Last fall, ten farmers in seven counties of the State secured an average daily gain of 1.4 pounds per head on 285 fattening hogs by hogging-off corn. After the cost of all supplementary feed, extra fencing, interest and labor had been deducted from the income on the operation, the farmers found that they had received an average net price of \$1.22 per bushel for their corn in letting the hogs harvest the crop. Corn was then selling on the Clearfield County markets at eighty cents a bushel. The best results were obtained by the farmers who had sown rape at the last cultivation of corn, or where soy beans had been drilled when the corn was planted.

Very obviously, a marketing problem is created by the fact that Clearfield County is dependent upon sections several hundreds of miles away for a large percentage of its supply of pork products. The problem is further complicated by the fact that consumer demand is not for hogs but for pork. In other words, the housewife does not go to the meat market and ask for so many pounds of pig, but specifies the particular cut or product that she wishes, such as bacon, ham, lard, or pork chops. Usually her purchases are made in small quantities, and, during hot weather, frequently in a form that requires little preparation. Hence, we find the "whole hog" of the Iowa farmer being parceled out by the 13th census, on April 1, 1910. Of the number reported 7,508 were given as being under six months of age. These figures would indicate that the total slaughter of hogs would not exceed 10,000 per year. The average dressed weight of hogs produced in the county is probably around 175 pounds per head, which, applied to the above figure of 10,000 would result in an annual production of 1,750,000 pounds of pork.

If these figures are even approximately correct, it is evident that this county produces less than 25 per cent. of the pork it consumes. The farm population of the county is in the neighborhood of 15,000 people, which would indicate that at least half of the pork produced in the county is consumed on farms. The remainder, left for market, which is probably somewhat less than a million pounds, is marketed chiefly during the fall and early winter months and is sold largely through meat markets to consumers in the form of fresh pork.

It would appear from the above statistics that Clearfield County is dependent on outside sources for at least three-fourths of its total supply of pork products and almost its entire supply of cured pork products, such as bacon, hams, and lard. Neighboring counties to the west are in somewhat the same condition, and the State of Pennsylvania as a whole is far from being self-supporting in production of pork products. The deficiency in supply must, therefore, come largely from without the State.

It is estimated that 90 per cent. of the commercial supply of hogs comes from the Corn Belt States, and when it is considered that the eastern States of the Corn Belt group are little more than self-supporting in the production of pork products, it is apparent that a very large percentage of the pork consumed in Clearfield County comes from hogs grown in such States as Iowa, Nebraska, and Missouri.

Clearfield County has never produced hogs in commercial quantities. Almost all of the pork produced within its borders that is not consumed on the farm is marketed locally during the late fall and early winter months. Such a practice may result in crowding the local demand for fresh pork to a degree that will depress the price below the point that could be realized by shipping to nearby markets. Such as Buffalo and Pittsburgh. If local market prices fall below prices on the central markets, freight and selling expenses on such markets considered, the co-operative shipment of hogs in carload lots to one of the larger markets would be a project well worth considering.

In this practice of hogging-off corn, the pigs should be gradually accustomed to the green corn before turning them into the field. They should not be put in until two or three days before the corn is ready to cut. If only a part of the corn is to be given over to the hogs, a temporary fence should be constructed to confine them in the desired area. An acre of average corn will ordinarily be sufficient to finish five to seven 125-pound hogs for market. A constant supply of fresh water should be at hand, and the pigs should also be given some protein supplement, preferably tankage, which may be placed in a self-feeder and kept before them at all times.

Worth While Quotation.

"Some people seem to take up all the sorrows of the past; to then they add the burdens of the present; then they look ahead and anticipate a great many more trials than they will ever experience in the future."

NEWS OF OUR NEIGHBORS

CURWENSVILLE

The strike of employees on the two floors in the finishing department of the Penna. H & L. tannery, which was pulled off last week from the fact that the men thought they were discriminated against in the distribution of the raise of wages, came to an end today by most of the men who left their work returning to assume their duties. Some of the men, however, refused to go back and are now laboring in some of the other industries.

R. K. Way's paper delivering boys went on strike Sunday and refused to take their routes unless Mr. Way made an advance on their salary. Way is willing to meet the boys half way and permit them to resume their respective routes next Sabbath.

Miss Irene McKenrick will be one of the Curwensville people who will represent the town as a juror at court next week.

Harvey Smith, Jr., employed in the office at the Crescent Refractories brick plant, was reported as being quite ill at his home yesterday.

George Kittleberger accompanied S. C. Watts to Juniata last Friday to visit his sister Mrs. Salome Watts, who has been ill at the home of a sister in that place. She is in a quite serious condition, being unable to leave her bed for any length of time, and can only move about at all by using a cane and crutch. This is not very encouraging news for her many Curwensville friends who have been living in the hope that she could be

brought to her home at an early date.

Curwensville barbers have gone into an agreement by which the hair cutting and shaving will be advanced a notch, the same to take effect on and after the 15th day of the present month.

This place was visited by a dandy rain yesterday afternoon and evening. An autoist arriving in town a little after four o'clock reported that at Reams and beyond, the storm had terrific force and that trees were uprooted and thrown across the highway, and that large limbs were being strewn so thickly that he was afraid every minute that his machine would be wrecked. Rain, he said, did not wait to come down in drops but landed in sheets. He was so busy in getting out of harm's way that he did not even have time to say the first dozen lines of the Lord's prayer. We have his word for it.

It is a peculiar state of affairs, but true nevertheless, that when laborers and mechanics are fortunate enough in securing a small lift in their wages, everything else moves up to meet it. Groceries advance the price, the clothier, the restorer and boot and shoe men all move prices in accordance to meet the raise. Even axle grease goes up a cent or two. Then how does the wage advance benefit the men for whom it was intended.

Miss Ruth Owens, a resident of Bigler, was a Sunday guest of Mr. and Mrs. Harry Leathers, Naulton.

PHONE AND MAIL SERVICE
Orders by telephone or by mail are solicited. Few people realize that with the exercise of proper care they can be served as well in their own homes as though they made a personal call. No extra charge for this service.

PURCHASED PEOPLE'S MEAT MARKET

N. A. Griebel, manager of the Green Front meat market, at Altoona for some time, has purchased the People's Meat Market on Third street from A. O. Bishop, who has so successfully conducted the same for the past five or six years.

Mr. Griebel, who is an experienced butcher, will take charge of the Bishop shop on Friday morning.

Mr. Bishop, we understand expects to locate in Johnstown.

Here is Huxley's Purpose.
To smite all humbugs, however big; to give a nobler tone to science; to set an example of abstinence from petty personal controversies and of toleration for everything but lying; to be indifferent as to whether the work is recognized as mine or not, so long as it is done—are these my aims? 1890 will show.—From T. H. Huxley's Diary.

THE HARLEQUIN BECOMES MORE POPULAR EVERY DAY

Since we have re-opened this place is getting to be more and more popular every day. Folks are finding that we are serving the daintiest of meals and in the daintiest way and the food is well cooked.

As one lady said, "It's just like home cooking."

THE HARLEQUIN TEA ROOM

Corner 2nd and Locust St.

GIFT THINGS HERE THAT KEEP MEMORIES FRESH AND PLEASANT

There is one of the most charming arrays of gift things here that you could imagine. There is a double satisfaction in buying these here for they will refresh the memory of the recipient every time the gift is used or they will give you that sense of satisfaction as the donor in that you will feel that you have given something worth while.

Drop in and look over the things. You will be glad that you did and probably there will be something that will fit in to that gift problem that you're facing.

PICKLING SPICES

Lots of folks do not think of their druggist when it comes to buying the spices they use for putting up the fall crop of pickles. But where would possibly be a better place to get them when your drug store is the logical place to go for everything PURE.

We have everything that you can possibly need and we'd like to show you how clean and pure everything is.

Aughinbaugh's

KEEP OUT THE FLIES WITH INCENSE

A little stick of incense will chase out and keep out the flies from your home—will remove those that will slip in regardless of your ever present watchfulness.

We have those that will bring the invigorating odor of the pines and then the more delicate odors such as the rose and the richer incense that you may prefer.

Cooking odors, that hang round during the summer, are also dispelled with this incense.

HAVE YOUR EYES CHANGED?

There is a slow but constant change in every person's vision. Glasses that fitted you perfectly a few years ago are probably entirely unsuited to the needs of your eyes today.

Every person who wears glasses should have their eyes examined at least every two years.

Call and see us and let us find out whether you're wearing the proper lenses. If a change of lenses is necessary, we'll furnish them promptly and reasonably.

Company**
Clearfield, Pa.

BRIGHT COLORS LIGHT THE WAY FOR FALL BLOUSES

Poinsettia is the brightest color of them all but in popularity, mufin a golden tan and fog, a new gray, are not lagging behind. They fashion Overblouses of Crepe-de-Chine, some with peplums that fall over the skirt, others with sashes that tie in back. Elaborate embroideries and beadings in peasant pattern are prominent and suggest that madame's suit worn with these Blouses will be a costume of style distinction.

Tub Blouses from **\$1.00 to \$5.50**
Silk Blouses from **\$3.95 to \$17.50**
